## RECORD OF TOWN MEETING.

APRIL 2, 1894.

A meeting of the inhabitants of the town of Needham, qualified to vote in elections and in town affairs, was held pursuant to the foregoing warrant, in the Town Hall, in said town, on Monday, April 2, A. D. 1894.

ARTICLE 1. Arthur Whitaker and Francis de M. Dunn were appointed tellers by the town clerk to aid him in checking the names of voters and counting the votes for moderator, and they were sworn to the faithful discharge of their duties by the town clerk.

John W. Titus was chosen moderator by ballot, and the check list was used.

ART. 2. Voted that we proceed to ballot for one selectman for one year; one overseer of the poor for three years; a town clerk for one year; a town treasurer for one year; one assessor for one year; one member (of) school committee for three years; one water commissioner for three years; two trustees of the public library for three years; one trustee of the public library for two years to fill vacancy; a collector of taxes for one year; two auditors for one year and two constables for one year; also to vote "yes" or "no" upon the following question: "Shall licenses be granted for the sale of intoxicating liquors in this town?" all on one ballot.

The selectmen having appointed Albert M. Miller and Arthur F. Woodward as ballot clerks, they were sworn to the faithful discharge of their duties by the town clerk.

The ballots prepared for use at this election by the town clerk were then delivered by him in a sealed package to said ballot clerks and their receipt taken therefor.

Cards of instructions were then posted in each of the voting compartments, and cards of instructions and the specimen ballots

were posted in the hall outside of the guard rail, as required by law.

The following persons were appointed and sworn by the moderator as tellers to aid him in receiving, sorting and counting the votes cast under this articles, viz.: Edgar H. Bowers, Arthur Whitaker and George W. Southworth.

The ballot box furnished by the secretary of the commonwealth for use at elections was publicly opened by the moderator and shown to be empty. The box was then locked and the key to the lower part delivered to William Wragg, the officer in attendance at the election. The polls were opened at two o'clock p. m., and were kept open until ten minutes past six p. m., when (as the meeting had voted) they were closed.

At the opening of the polls the ballot box register indicated 0–0–0.

Additional tellers were appointed by the moderator and sworn by him, viz.: Charles E. Stanwood, Charles Evens, Jr., George L. Kingsbury, J. Smith Beless, Charles H. Crowley, Charles L. Judkins, Elwyn R. Thorpe and George H. Burchum.

During the voting the ballot box was opened once by the moderator, with the consent of the town clerk, for the removal of ballots, and again at the close of the polls, when the register stood at 548. The ballots were audibly counted one by one by the moderator as they were taken from the box, and the whole number was five hundred and fifty-five (555). The whole number of votes cast by men voters was 496. The whole number cast by women voters for school committee was 59. The names on the list of men voters which had been checked by the tellers were counted and the number was found to be 496. The number of names checked on the list of women voters was 59. The number of names checked on the lists kept by the ballot clerks at the entrance to the voting place was as follows: men, 496; women, 59.

A canvass of all the votes given in was made by the moderator and tellers, the blank forms furnished by the secretary of the Commonwealth being used. Upon the completion of the canvass of all the votes cast, the moderator declared the result of the voting to be as follows, viz:

# RECORD OF TOWN MEETING

## May 2, 1894,

A meeting of the inhabitants of the town of Needham, qualified to vote in elections and in town affairs, was held pursuant to the foregoing warrant, in the Town Hall in said town on Wednesday evening, May 2, 1894.

Article 1. John W. Titus was nominated and chosen moderator.

Art. 2. Voted that the votes passed at the town meeting held June 23, 1893, in regard to the issue of bonds for the purpose of constructing the electric light plant, be rescinded.

Art. 3. Voted that the selectmen in pursuance of the provisions of Chap. 182 of the Acts of the Legislature of 1894 be authorized and directed to issue bonds to the amount of thirteen thousand and five hundred dollars, said bonds to bear on their face the words Needham "Electric Light Loan," to bear interest at the rate of four per centum per annum payable semi-annually on the first days of May and November in each year, to be of the denominations of five hundred and one hundred dollars, to be dated May 1st, 1894, to be signed by the treasurer of the town and countersigned by the selectmen, to be payable in such manner and at the expiration of such periods that one hundred dollars of said loan be paid in each of the years from 1895 to 1899 inclusive, three hundred dollars in each of the years from 1900 to 1904 inclusive and five hundred dollars in each of the years from 1905 to 1919 inclusive and 800 dollars in each of the years from 1920 to 1924 inclusive.

(Passed unanimously.)

Art. 4. Voted that the selectmen invest the School Fund as soon as possible in bonds that will net the town not less than four per cent per annum, preference being given to Town of Needham bonds, either Electric Light or Water Loan.

Art. 5. Voted to adopt the following by-laws, to wit:

Section 1. Every plumber before doing any work in a building shall, except in the case of the repair of leaks, file at the office of the board of license, upon blanks for that purpose, a notice of the work to be performed, and no such work shall be done in any building without the approval of said board.

Sect. 2. The plumbing of every building shall be separately and independently connected with a proper and sufficient drain, connected thereto outside of the building with a proper cesspool.

SECT. 3. Pipes and other fixtures shall not be covered or concealed from view until approved by the inspector, who shall examine the same within two working days after notice that they are ready for inspection.

SECT. 4. Plumbing work shall not be used unless the same has first been tested by the plumber in the presence of the inspector with the water test, or, if that is not practicable, with the peppermint or other reliable test, and approved by said inspector.

SECT. 5. Drain and connecting ventilating pipes shall be of sufficient size and made of cast-iron within the building and for a distance of five feet outside, except that lead pipes may be used for short connections exposed to view. Such pipes shall be of uniform thickness throughout, free from all defects, and shall have an average weight not less than that below specified:

| | | | |
|---|---|---|---|
| 2-inch | pipe, | $2\frac{3}{4}$ | lbs. per ft. |
| 3 | " " | $4\frac{3}{4}$ | " " |
| 4 | " " | $6\frac{1}{2}$ | " " |
| 5 | " " | 9 | " " |
| 6 | " " | 10 | " " |
| 8 | " " | 17 | " " |
| 10 | " " | 22 | " " |
| 12 | " " | 27 | " " |

SECT. 6. Drain and connecting ventilating pipes for public buildings and for all buildings having more than one set of plumbing, namely: 1 bath, 1 bowl, one sink, 1 water-closet, shall be made of extra heavy cast-iron pipe, free from all defects, and shall have an average weight not less than that below specified.

| | | | |
|---|---|---|---|
| 2-inch | pipe, | $5\frac{1}{2}$ | lbs. per foot. |
| 3 | " " | $9\frac{1}{2}$ | " " |
| 4 | " " | 13 | " " |
| 5 | " " | 17 | " " |
| 6 | " " | 20 | " " |
| 8 | " " | $33\frac{1}{2}$ | " " |
| 10 | " " | 45 | " " |
| 12 | " " | 45 | " " |

SECT. 7. No tar-coated cast-iron pipe shall be used. Drain pipes shall be properly secured by irons to walls, suspended to floor timbers by strong iron hangers, or when unavoidable, laid to uniform grade in brick trenches of sufficient width to admit of access to all joints and provided with movable covers.

SECT. 8. Every drain pipe shall be supplied with a running trap the same size as the drain, and placed with accessible cleanout near the point where it leaves the building and shall have a fall of 1-2 inch per foot. If the trap be inside cellar wall, the cleanout shall be on house side of the trap. There

shall be a fresh-air inlet, entering the drain between the main trap and all house connections, of not less than four inches internal diameter and extending into the external air at least two feet above the ground and away from all doors and windows and be protected by a cowl or a turn bend properly fastened. That portion of the house drain which is outside of the building and more than five feet from the foundation walls, shall be of the best quality of vitrified drain pipe or of extra heavy cast-iron soil pipe. No house drain or private sewer shall pass under another house, nor within four feet of the cellar wall of another. No trap shall be placed at the foot of a vertical soil pipe. All drain pipes shall be exposed to sight where practicable within buildings, and shall not be exposed to pressure where they pass through walls. Changes in direction shall be made with curved pipes, and all connections with horizontal or vertical pipes shall be made with 1-8 bends and Y branches or sanitary tees. Drain pipes shall be carried above the roof, open and undiminished in size, and not less than five feet above the top of any window within fifteen feet.

Sect. 9. No rain-water conductor shall be connected with the house, drain, sewer or cesspool. No rain-water conductor shall be used as a soil, waste or vent pipe, nor connected therewith, nor shall any soil, waste or vent pipe be used as a rain-water conductor. In no case shall a soil or waste, or air pipe from a soil or waste pipe be connected with a chimney. No ventilation will be required from a deep drum trap in cases where there is no other plumbing than a sink waste and in which no soil matter is admitted.

Air pipes shall be so constructed as not to allow the formation of a trap nor be used as waste pipes. All waste or overflow pipes from safes, under fixtures or from tanks shall be run separately to cellar and left open. In no case shall they be connected to any soil or waste pipe. No waste pipe from a refrigerator or other receptacle in which food or provisions are stored shall be connected with a drain or waste-pipe, but shall be separated therefrom by an open-air sink furnished with a trap. The waste pipe of each and every sink, basin, bath-tub, water-closet, set of trays, or other fixtures shall be furnished with a separate trap, which shall be placed as near as practicable to the fixture that it serves. Traps shall be protected from siphonage by air pipes of a size not less than the waste pipes they serve run from the crown of the trap. Air pipes may be of lead (exposed) or of cast or wrought iron pipe, but in every case of connection with the drain pipe such connections shall be made above the upper fixture of the building. Air-pipes for water-closet traps shall be of 2-inch bore. No ventilation shall be required from one-half S. traps for water-closets. No return bends shall be allowed except by special

permission of the inspector. Seat vents shall be introduced whenever practicable. Every water-closet or line of water-closets on the same floor shall be supplied with water from a separate tank, and shall have a flushing pipe of not less than 1 1-4 inches in diameter.

SECT. 10. Every joint of an iron and lead pipe shall be made by a brass ferule wiped on and set in the hub of the branch of the iron pipe and caulked with lead. Every joint in a cast-iron bell and spigot pipe shall be made with packed oakum and molten lead at least 1 1-2 inches deep, and well caulked and made water and air tight and no paint or putty shall be allowed until it has been tested.

SECT. 11. No person shall discharge any contents of any privy, vault, manure pit or carriage wash into a public drain or service, except through an intervening catch basin, the outlet pipe of which shall be high enough above the bottom to prevert any but liquid contents from passing over into the drain or sewer. A sufficient trap shall be placed in every drain connecting such catch basin with cesspool.

SECT. 12. Every public cooking establishing shall have a grease trap under sink, easily accessible for cleaning or inspection.

SECT. 13. Every privy vault, shall be of brick and cement or stone and cement of a capacity not less than sixty cubic feet, of easy access and made tight. The inside shall be at least four feet from the next lot and from any public or private way.

SECT. 14. Whoever violates any of the provisions of this ordinance shall be liable to a penalty of not more than $100, unless another penalty is specifically provided herein.

CESSPOOLS.

All cesspools shall be constructed of brick or stone laid in cement two feet from the top, and be provided with iron rim and cover, or large flat stone. Cesspools shall be at least twenty feet from any building, except by special permit of board of health, and in no case shall soil or waste water from any soil or waste pipe be allowed to run or remaim on the surface.

*These By Laws were approved by the Superior Court, May 28, 1894 and published in the Needham Chronicle, June 9, 1894.*

Voted that it is the sense of this meeting that the selectmen put in a circuit of electric street lighting on Grove street between Charles River street and Wellesley line, and charge the expense to maintenance.

Voted that the thanks of the town be presented to the moderator for his efficient services at the annual meeting and at this meeting.

Voted that this meeting be dissolved.

Dissolved.

Attest: CHARLES C. GREENWOOD,
Town Clerk.

## RECORD OF STATE ELECTION,

November 6, 1894.

In pursuance of the foregoing warrant the inhabitants of the town of Needham, qualified to vote in elections, met in the town hall in said town, on Tuesday, the sixth day of November, in

the year one thousand eight hundred and ninety-four, it being the Tuesday next after the first Monday in said month, and were called to order at three minutes past six o'clock in the forenoon by Arthur Whitaker, chairman of the board of selectmen, who read the warrant calling said meeting and the return thereon of the officer who notified and warned the inhabitants.

The selectmen having appointed Albert M. Miller, Arthur F. Woodward, Francis T. Probert and Edwin M. Grover as ballot clerks, they were sworn to the faithful discharge of their duties by the town clerk.

The package containing the "first set" of ballots received from the Secretary of the Commonwealth was then delivered by the town clerk to the chairman of the selectmen, who publicly opened the package and delivered the ballots to the ballot clerks.

Cards of instructions, together with a copy of the proposed amendment to the constitution were then posted in each of the voting compartments as required by Section 149, Chap. 417 of the Acts of 1893.

Cards of instructions, specimen ballots and copies of the proposed amendment to the Constitution were posted in the hall outside of the guard rail in accordance with the provisions of said act.

The ballot box furnished by the Commonwealth for use at elections was then publicly opened and shown to be empty and was examined by the selectmen and town clerk and found to be empty. The box was then locked and the key to the lower part delivered to William Wragg, the officer in attendance at the polling place.

The polls were opened for the reception of ballots at twenty minutes past six o'clock in the forenoon and were kept open until thirty-one minutes past four o'clock in the afternoon, when as the meeting had voted, they were closed. At the opening of the polls the ballot box register stood at o-o-o.

Arthur F. Woodward was appointed a teller by the selectmen and sworn to the faithful discharge of his duties by the chairman of the board.

The selectmen appointed the following as tellers, viz:

Arthur Latham, Geo. W. Tisdale, Emery Grover, Charles Evans, Jr., Daniel Buckley, James W. Burke, F. de M. Dunn, and Armand J. Mathey and they were duly sworn to the faithful performance of their duties by the town clerk.

During the voting, the ballot box at fifty-five minutes past one o'clock, was opened with the unanimous consent of the selectmen and town clerk, and 402 ballots taken out. At the close of the

polls the ballot box register stood at 564. As the ballots were taken from the box they were audibly counted one by one and the whole number was five hundred and seventy four (574).

The names on the list of voters used at the ballot box, which had been checked, were audibly counted and the number found to be five hundred and seventy-three (573.) The names checked on the list kept by the ballot clerks, were counted and the number was five hundred seventy-four (574).

A canvass of all the votes given in was made by the election officers as required by the provisions of Chap. 417 of the Acts of 1893, the blank forms furnished by the secretary of the commonwealth being used. Upon the completion of the canvass of all the votes cast, and the whole number duly sorted, counted, and recorded, public announcement thereof was made in open meeting by the town clerk and was as follows.

Blanks, one hundred eleven.

*For County Commissioners.*

Thomas Blanchard, of Stoughton, to fill vacancy, had three hundred thirty.
William W. Burke, of Weymouth, to fill vacancy, had thirty-eight.
Nelson W. Green, of Hyde Park, full term, had thirty.
Melville P. Morrell, of Hyde Park, full term, had two hundred ninety.
Henry E. Ruggles, of Franklin, full term, had one hundred twenty-seven.

*For Representative in Congress, Eleventh District.*

Whole number of ballots, five hundred seventy-four.

John F. Dowd, of Hyde Park, had thirty-six.
William F. Draper, of Hopedale, had three hundred fifty-nine.
Bentley Wirt Warren, of Boston, had one hundred thirty-eight.
Blanks, forty-one.

*Amendment to the Constitution.*

Shall the proposed amendment to the Constitution relative to Commissioners of Insolvency be approved and ratified?

Whole number of ballots, five hundred seventy-four.

Yes, two hundred ten.
No, fourty-four.
Blanks, three hundred twenty.

In voting no person was given a ballot by the ballot clerk until his name had been found upon the list of voters and checked, and a check list was used by the election officers at the ballot box.

The business of the meeting being completed, the returns of votes were signed by the selectmen, attested by the town clerk and sealed up in open town meeting as required by law, and deliver to the town clerk.

The ballots cast, the undistributed ballots and spoiled ballots and also the voting lists used were then sealed up and endorsed by the election officers and placed in the custody of the town clerk, in accordance with the law in that case made and provided.

And on motion the meeting was dissolved at fifteen minutes past nine o'clock.

## REPORT OF THE TRUSTEES.

---

In presenting our annual report we feel compelled to ask for a more commodious and safe location. The risks from fire in the present location are very great, so much so, that we can only get insured for one year at a time, and that at a very high rate. From a sanitary point of view the location is bad. The ventilation is poor and comes from a quarter which is liable to fill the room with unpleasant odors. The size of the reading room is entirely inadequate to meet the demands of the public. There is also a great lack of shelf room for the proper care of the books. A growing town like this with so many young people to use and profit by the reading room, needs a large, well ventilated, attract-

ive room which will be an inducement for them to spend their time there instead of on the street or in less profitable places and pursuits. Many towns are now erecting buildings exclusively for library purposes, and it is hoped that it will not be long before Needham will follow their example. The donations of books the past year have been quite liberal, and doubtless we should have received many more if we had, had conveniences for storing them. Through the kindness of Geo. K. Clarke (one of the trustees), we have received from the Mass. Historical Genealogical Society a donation of 119 volumes.

You will see by the librarian's report that the number of volumes issued this year is about 1000 in excess of last year, which shows an increasing interest. The trustees have taken great pains to satisfy the demands of the reading public. Special care has been given to the selection of historical works. It is a pleasure to know that the teachers avail themselves of the extra advantage allowed them by the trustees in taking out books for school use.

In view of the increasing demand for books it is hoped that the town will be liberal in its appropriation.

A. E. MILLER,
Chairman.

# REPORT OF THE AGENT

OF THE

# BOARD OF HEALTH.

*To the Board of Health*:

GENTLEMEN: I present herewith my report for the year ending Dec. 31st, 1894.

The work during the year has been large and varied and the demands are continually increasing.

The public health is of the greatest importance, and no labor or expense should be spared to elevate the standard of our town. To do this the Board of Health is looked to as the acknowledged leader of public opinion, and every year the public mind is being educated on sanitary matters, and people require better protection from sources of filth and disease.

During the year 1894 Needham has maintained its usual reputation for healthfulness. The death rate of the town has been less than for several years. The whole number of deaths for the year is fifty-two (52) giving an annual death rate of about 15 per cent per 1000 on an estimated population of 3400.

## DISEASES DANGEROUS TO PUBLIC HEALTH.

The year just closed has been exceptionally free from any contagious or infectious disease, only four (4) cases having been reported to the board as follows:

Diptheria, 1; Scarlet Fever, 3.

While some of our neighboring towns and cities are suffering a serious epidemic of diptheria, and other contagious diseases, Needham with its pure air, pure water and dry sandy soil is almost entirely free from these diseases, and it is a matter of sincere congratulation to the town.

## SMALL POX AND VACCINATION.

During the appearance of small pox in certain of our neighboring cities an effort was made to ascertain the number of unvaccinated children attending our schools, as a result of this investigation by the Health officer assisted by the teachers, between 70 and 75 pupils were found without evidence of vaccination. Feeling that at least our children should all be vaccinated as the law requires, and owing to the straightened circumstances of many of our citizens, who could not afford the expense and who were compelled to take their children from school: at the suggestion of prominent citizens and by vote of the board, vaccination was made free to

all pupils of the public schools who had not been successfull vaccinated.

### Nuisances.

We have investigated all complaints made, and acted according to our best judgement, all complaints received are strictly confidential, therefore no anonymous communications need be resorted to. In dealing with nuisances the board has been careful not to exceed its legal powers, and we hope public opinion will hereafter sanction a higher standard than is at present possible to attain.

There has been a gradual decrease of certain kinds of complaints from previous years, this can only be accounted for by the fact that the sanitary conditions of the town have improved, and several of the larger piggeries which were formerly located in thickly settled portions of the town have been abandoned by their owners. One piggery located near a large manufactory was complained of late in the fall, but rather than commence legal proceedings, a conference was held with the board and owner, and the matter was satisfactorily adjusted, he promising to diminish the number and finally go out of the business on or before January 1st. 1895.

### Plumbing.

On the adoption of by-laws relating to plumbing May 2nd. 1894, and the appointment of inspectors of plumbing, as provided by law, this department has been taken from the control of the health officer, the inspectors working directly under the board of health, and we presume a proper report will be made by them.

### Conclusion.

In concluding this my last report as health officer, I desire most earnestly to encourage the citizens in their endeavors to support the board ; many citizens recognizing its importance, it should continue to gain, until all citizens recognize that "Public Health is Public Wealth," and that any town or people, like individuals must have health in order to prosper.

To the members of the board and all who have assisted and supported me during the past years. I desire to extend my grateful acknowledgement, I shall always take a deep interest in the work of the board, and trust that it may ever advance in the good work in which it is engaged.

Respectfully submitted,

ALBERT M. MILLER,
Health Officer.

# FIFTH ANNUAL REPORT

OF THE

# WATER COMMISSIONERS.

*To the Inhabitants of the Town of Needham*:

The water commissioners would respectfully present their report for the year ending Dec. 31, 1894:

At the annual town meeting Mr. John M. Hodge was re-elected for three years. The board organized by choosing James Mackintosh as chairman and George A. Adams as secretary.

## Extensions.

The town voted to authorize the water commissioners to make such extensions of the water mains as in their judgement would be for the interest of the town. It seems unfortunate for the town that it does not adhere to this wise provision made at the annual meetings instead of allowing selfish interests to come into town meetings during the year and contravent such action. It is this deviation from that wise and judicious course in the extension of our water mains that is giving us higher rate of taxation without adequate advantages therefore, under the above vote we have made the following extensions: May, Warren, Rosemary, Pine Grove Sts., Fair Oaks Park, and by vote of the town extension of Rosemary St., and Hillside Ave. laying 365.1 feet of 8 in. pipe and 6001.8 feet of 6 in pipe making a total for the year of 6366.9. This added to that previously reported would make a total of 116,486 feet or 22.06 miles. For distance in streets see list of pipe laid in the streets in this report.

We have caused to be set 9 hydrants making in all 178 hydrants all of the Ludlow pattern. We have also caused to be set 10 gates and boxes making in all 170.

## Pickering and Kingsbury streets.

It was necessary for us to take up and lower 572.8 feet of pipe on these streets owing to the change of grade made by the selectmen on Pickering street at an expense of about two hundred dollars.

## Pipe.

The lowest proposals for furnishing the pipe was from R. D. Wood & Co. Philadelphia, Pa. The contract was dated May

17, 1894 at the following prices: 6 in. pipe, $22.85 per long ton. Specials, $2.40 per 100 lbs.

The lowest proposal for the second lot was from the same parties at the following prices: 6 in. pipe, $24.35 per long ton: $2.50 per 100 lbs. specials. All F. O. B. at Needham.

### Pipe Laying.

The contract was awarded to Joseph Bruno of Boston at the same prices paid last year, except the extension on Rosemary St. where the price was 2c. per foot higher.

### Service Pipes.

The contract for putting in the service pipes was continued another year with J. F. Buckley & Co. of Needham at the same price as last year.

### The Bonded Debt.

The bonded debt. has been reduced during the last year two thousand dollars and as now adjusted matures as follows;

| | |
|---|---|
| $2000 each year from 1895 to 1900 inclusive, | $12,000 00 |
| For the year 1901, | 5,000 00 |
| For 1902 to 1917 inclusive $5,500 each year, | 88,000 00 |
| For 1918 to 1920 inclusive $6,000 each year, | 18,000 00 |
| For 1921, | 5,500 00 |
| For 1922, | 1,500 00 |
| The amount of outstanding bonds is, | $130,000 00 |

We have borrowed in anticipation of issuing the water loan bonds $6,000 00 making the total indebtedness $136,000 00.

### Estimates for 1895.

The board have estimated what in their judgment will be needed to meet the expenses in 1895.

| | | |
|---|---|---|
| Interest, | $5,440 00 | |
| Salaries, | 1,520 00 | |
| Coal and wood, | 700 00 | |
| Miscellaneous, | 400 00 | |

Water Commissioners.

# Superintendent's Report.

*To the Honorable Board of Water Commissioners*:

GENTLEMEN:— I have the honor to present herewith the annual report of this department for the year ending Dec. 31, 1894:

The water mains have been extended the past year as follows: 361.6 feet 8 in. on May street, 949.5 feet 6 in. on Warren street, 1119.9 feet 6 in. on Fairoaks Park, 2112.9 feet 6 in. on Rosemary street, 1346.1 feet on Hillside avenue, 382.0 on Pine Grove street, with hydrant connection makes a total of 6366.9 feet or 1.2 miles. A 6 in. pipe has been put from the street Main into the factory owned by Mr. Willian Carter and occupied by the Union Cycle Co., which is to be used for fire purposes only, and the cost of construction was charged to the owner of the property as per vote of the town. With this pipe to supply the hydrants and sprinklers in the factory, and the four street hydrants situated within a radius of 550 feet will give first class protection to the property.

For detail statement of the extension of mains see following tables.

### Water Supply.

During the drougth of the past summer there was a chance to test the capacity of the spring and although there was over two hundred-fifty thousand gallons taken from it at one pumping there was not a day that water did not run to waste several hours, and with the adoption of meters to prevent the unnecessary and wasteful consumption of water, there is no doubt the spring will yield sufficient to supply the town for years to come.

The grounds around the supply well have been concreted, making a needed inprovement as it makes it impossible for any foreign matter to get to the water, the condition of the water is good as will be seen by the following analysis.

### Consumption.

| | |
|---|---|
| Estimated population of the town, | 3,900 |
| Estimated population on line of pipes, | 2,900 |
| Estimated population on lines of pipe supplied with water, | 2,550 |
| Total number of gallons consumed in 1894, | 40,959,255 |
| Average number of gallons consumed each day, | 112,217 |
| Average number of gallons to each tap, | 83,081 |
| Average number of gallons per day to each tap, | 226 |
| Average number of gallons per day to each inhabitant, | 28.7 |
| Average number of gallons per day to each consumer, | 44 |

### Metered Water.

| | |
|---|---|
| Number of gallons passed through meters, | 8,399,190 |
| Average number of gallons to each meter (220) | 38,178 |
| Average number of gallons per day to each meter, | 104.5 |
| Receipts per million gallons, | $317 64 |
| Average from each meter (20 been in use less than 6 months), | $12 12 |
| Total receipt for metered water, | $2,668 09 |
| Number of gallons passed through $20.00 rate meters, | 2,516,240 |
| Average number of gallons to each meter, | 125,812 |
| Number of gallons passed through ($10.00 rate meters), | 5,882,950 |
| Average number of gallons to each meter. | 41,995 |

UNMETERED WATER.

| | |
|---|---|
| Total number gallons unmetered water, | 32,560,065 |
| Estimated number of gallons used for town purposes, | 7,000,000 |
| Number of gallons used for domestic purposes, | 25,560,065 |
| Number of gallons to each tap for domestic purposes, | 98,308 |
| Number of gallons per day to each for domestic purposes, | 269 |
| Receipts per million gallons for domestic purposes, | $77 94 |
| Average amount for each tap, | $7 66 |
| Total receipt for unmetered water. | $1,992 28 |
| Cost for coal per million gallons water pumped, | $15 50 |
| Total cost to furnish water per million gallons, including interest on plant and cost for maintenance, | $192 25 |
| Receipts per million gallons, | $125 32 |
| Receipts from guarantees (above water rates) in 1894, | $435 70 |
| Receipts from extra water by meter above meter rates in 1894, | $510 58 |

The above figures show that 8,399,190 gallons of metered water was sufficent to supply nearly 50 per cent of the consumers while it took 32,560,065 gallons of unmetered water for public purposes, and supply the rest of the consumers. This of course shows a great waste of unmetered water and the advisability of placing a meter on every service, the waste water benefits no one and costs the town no small amount to furnish.

There may be a time in the near future when the capacity of our spring will not allow this waste to continue, but we should not wait until our supply fails, before we look for a remedy. I firmly believe the only way of correcting this evil, is the adoption

of the meter system, as it is the only equitable way to furnish water, there is no reason why consumers should have water unmetered for 7cts. and 8 mills ($0.078) per thousand gallons while those metered pay 31 cents 7 mills ($0.317) per thousand gallons in view of these facts, I earnestly recommend the adoption of the meter system.

Respectfully submitted,

GEORGE A. ADAMS,

Superindent.

# ANNUAL REPORT

## OF THE

# Selectmen and Overseers of the Poor

FOR THE YEAR 1894.

### HIGHWAYS.

The citizens of the town are to be congratulated upon our good fortune, in again being able to secure the valuable services of our veteran road builder, Mr. C. H. Dewing as superintendent of streets. The work of the highway department under his direction is reported in detail by him elsewhere. We would respectfully call attention to a number of suggestions made in said report.

The Massachusetts board of highway commissioners has been interviewed in relation to the building of a state highway partially within our town, namely, the extention of Great Plain Ave. easterly, on the same line as it passes through the village, to connect with Baker street in West Roxbury. If the state would build this two and one half miles of road (one and one half miles of which is in the town of Needham) the only expense to the town would be the cost of the survey and the land damages, it would not only give our town a much shorter route to Boston by road and a valuable railroad connection at Spring street, but it would be a great benefit to many other towns beyond us. It is our opinion that the town should hasten to survey this line and make application for its construction as a state highway. The present legislature will doubtless appropriate a large amount of money for that purpose and a vigorous and well directed effort on our part may result in a portion of its being spent in Needham, developing the town and benefiting a large territory beyond our limits.

The board has made some investigations in relation to the abolishment of the crossing at grade of the N. Y. & N. E. railroad and Rosemary street. A great improvement could be made by the relocation of Rosemary street between Highland and Hillside avenues, by starting at its present junction with Hillside Ave. and running about straight, under the railroad track, to the foot of the hill on Highland Ave., meeting that avenue nearly

opposite the dividing line between the Watson and Moseley estates. This plan would abolish a very dangerous grade crossing, would give us a street with an easy grade instead of the present steep one, and a more direct and accessible street between the village of Needham and the bicycle factory. The expense is borne in such cases by the state, railroad and town, in this case the proportion of expense which the town would be called upon to bear would be according to the engineer's estimate about seven hundred dollars.

GUIDE BOARDS.

The removal of the old oil lamps, on which were lettered the names of the streets, upon the introduction of electric light, necessitated the erection of street signs. Metalic signs of a tasty design mounted on the discarded oil lamp poles neatly painted present an attractive appearance. A departure has also been made in the style of guide boards placed in the villages of the town, gilt letters on a black back ground are much more durable and artistic than the ones formerly in use.

SIDEWALKS.

The appearance of the village of Highlandville has been greatly improved by the concrete and edgestone abutting the business block of Mr. S. G. Low. We would again call attention to the desirability of building a continuous concrete sidewalk between the villages of Highlandville and Needham.

POOR.

The business depression which we have been passing through has had the effect of increasing the expense of this department the past year. The bills for relief of people having a settlement on our town but residing in other towns and cities have been unusually large. Five hundred and sixty-four tramps have been entertained during the year. On April first the night watchman was assigned the duty of caring for them, since that time it has cost the town less than five cents per head for their support.

ELECTRIC LIGHTS.

The unprecedented dry weather of last summer rendered the electric lighting system about worthless for a period of two or three months, there being insufficient water power to operate the dynamo successfully, trouble has also been experienced on account of improper service in the care of the lines and the renewing of burned out lamps. Prompt and efficient service however has been the rule since the Eliot Falls Co, secured the services of Mr. Charles A. Searcy. All cases of needed repairs in the wires, or lamps burned out, should be reported to him when discovered, by postal card or otherwise and they will receive immediate attention.

Grove street from Charles River street to the Wellesley line has received the electric lights in accordance with the provisions of the resolution passed by the town. Ten lights were required to light the street properly making the total number of incandescent lamps in use on the system three hundred and ten. If the town should consider it advisable the service could be improved by adding 20 lights to the system, most of them on the present lines, but in some cases poles would be used to extend the line further on streets already lighted.

We expect that the company will be prepared to do commercial lighting at once and that a supplementary steam plant will be placed in the power house to guard against a repetition of last summer's service.

LITIGATION.

In the case of Watson vs. the town of Needham a settlement was effected without the consent or knowledge of the authorized agents of the town.

The High Rock street case is still before the courts with a prospect of an early settlement.

## REPORT OF BOARD OF EXAMINERS OF PLUMBERS.

The Board of Examiners of Plumbers was organized and prepared to do business on the ninth day of last July and since that time six applicants have presented themselves before the board for a license to do the business of plumbing within our town, they were examined and being found competent were given licenses. The board has been in session every Monday evening from 7.30 to 8.30 p.m., to transact such business as has come before it.

## REPORT OF INSPECTORS OF PLUMBING

There has been twenty-seven applications for plumbing jobs in the town since the ninth day of July last for which permits have been granted and the most of said jobs were new houses and some of them alterations of jobs already in and they have been inspected and have been done in accordance to the By-Laws of the town in regard to plumbing. We would recommend all persons contemplating building within the town to call upon the inspectors for a copy of the By-Laws and study them and thus avoid the trouble that we have had in regard to the changing of some of the jobs and cesspools after they had been partly done, making extra expense to the owner of property on account of their ignorance of the By-Laws.

# REPORT

OF

# Superintendent of Streets.

To the Board of Selectmen:

Gentlemen:—I herewith submit my report of streets for the year ending Dec 31, 1894:

The past season has been an unusually unfavorable one for our streets, owing to the extreme and long continued drouth, causing them to be loose and stony to some extent, and being followed by heavy showers, washing them badly in many places.

Good men have been employed who have shown themselves prompt and efficient in their services.

Teams were employed agreeably to your direction which have done their work in a satisfactory manner.

The season being favorable, work was commenced about the first of March, about a month earlier than usnal.

About three hundred tons of stone already at the crusher were crushed and used mostly on Highland ave. and Chestnut street making good work where it was needed.

A large amount of gravel was put upon the streets during March and April, but we lacked the condition of moisture, which was necessary to make the use of the street roller of much advantage, though town water from hydrants was used in several instances with very good results, but is not practicable at all times and places as needed.

A street sprinkler would be much more available and do the work more satisfactorily giving us much more benefit from the use of the roller which is of great advantage to our streets.

There has been something more than 1-2 mile of street made with stone foundation by using in connection with our crushed stone, about five hundred and fifty loads of small cobble stones from our gravel pits, the larger ones about one hundred and fifty loads being hauled to the crusher, ready to be crushed in early spring.

There was not as much accomplished with the road scraper in smoothing ruts as I wished on account of the streets drying so quickly, after the frost was out, but it was used to advantage on the shoulders and in the gutters, improving the condition and appearance of many streets very much.

Avery street and Pickering street extension have been built in a thorough manner and will require but very little repairs for a long time.

The sidewalks on Pickering extenaion would have been built if conditions had favored.

I hoped and expected to have made repairs on portions of Gr. Plain Ave. that are much needed, but lacked the funds to make them in a manner thought desirable.

But a small portion of our streets were ever thoroughly built, so that we are to quite an extent building instead of repairing.

Concrete sidewalks and crosswalks have been made to some extent, adding much to the comfort of our citizens and giving our town a more inviting appearance.

Gravel sidewalks have been made where most needed and repairs have been made on many already existing.

Our best gravel pits are situated in the out-skirts of the town, mostly on the north and east, while the central and southwest portions are almost destitute of good gravel, necessitating long hauls which are expensive.

The section destitute of good gravel abounds in rock, and I would suggest the relocation of the crusher in some favorable situation in this rocky district, which if found advisable after investigation, would prove of great advantage in way of material for this section, and at the same time be more central for the whole town.

In order to get the best results from the use of the crusher, we very much need the screens, as screened stone make much better road material, and the screens would be valuable on our sidewalks.

# ANNUAL REPORT

## OF THE

# Chief of Fire Department

FOR THE YEAR ENDING DEC. 31, 1894.

To the Selectmen of Needham:

Gentlemen: —I have the honor herewith to submit to you the annual report of the fire department for the year ending Dec. 31, 1894. The fire loss as compared with previous years leaves no opportunity for criticism; the risks have largely increased but greater care and precaution seems to have been exercised by all classes. It is evident that prevention is the great point to attain in reducing the loss by fire. The loss on buildings and contents for the year has been fourteen hundred dollars covered by insurance of seven thousand one hundred dollars.

I would like to caution people about burning brush on woodland as it is liable to get beyond control and not only damages other peoples woodland, but makes a large expense for the town especially when there is an alarm pulled in and as the apparatus is very seldom needed at a brush fire, all persons discovering a brush fire unless some building is in immediate danger should notify the chief or assistant chief and they will see that it is extinguished as soon as possible.

During the year the department has answered to the following calls. Bell alarms, 13; still alarms, 3; verbal alarms, 7.

Six of these alarms were for buildings, one alarm for railroad bridge and six for wood and grass fires, the three still alarms were for wood fires. There were seven verbal alarms for wood fires.

In addition to the above there were three fires extinguished by police, fireman, and citizens without an alarm making a total of 26 fires.

In responding to these calls the apparatus and members have rendered the following service: ladders used, 105 feet; hose used, 3,400 feet; miles travelled, 43 miles; duration of service, 365 hours.

The above alarms were given as follows: Firemen, 6; police, 1; citizens, 16.

The total number of men in the department is 40 as follows: Chief of department, 1 man; assistant engineers, 4 men; superintendent fire alarm, 1 man; Hose Co. No. 1, 10 men; Hose Co. No. 2, 10 men; Hose Co. No. 3, 4 men; Hook & Ladder Co. No. 1, 10 men.

Statement of duty performed by each company.

| Company | Ladders | Hose | Miles | Duration Services |
|---|---|---|---|---|
| Hose 1 | | 1,000 ft. | 11 | 94 hours |
| Hose 2 | | 1,900 ft. | 13 | 91 hours |
| Hose 3 | | 500 ft. | 2 | 25 hours |
| H. & L. | 105 ft. | | 17 | 77 hours |
| Total | 105 ft. | 3,400 ft. | 43 | 287 hours |

There were 20 hours service rendered by asst. engineers. In addition to the above there were 58 hours service rendered by men outside the department extinguishing brush fires making a total of 365 hours.

### STATEMENT OF HOSE AND WHERE DISTRIBUTED.

The department has 3,700 feet of hose distributed as follows: Hose 1 Chestnut St., 1,300 ft.; Hose 2, Highlandville, 1,200 ft.; Hose 3, Central Ave. Upper Falls, 500 ft.; residence of Geo. A. Alden Ridge Hill, 700 ft.; making a total of 3,700 ft.

There is 900 feet of this hose that has been in service ten years, 500 feet of which leak badly and ought to be replaced by new, and the remaining 400 feet is liable to give out at any time, and I would recommend the purchase of 500 feet of new hose at an early date.

The apparatus in active service is as follows: 2 hose wagons, 1 truck, 2 hose reels, 1 hand fire engine.

The apparatus has been maintained in good working order throughout the year the necessary repairs have been done on Station No. 1 and also new window shades in both stations. No. 2 Station needs renovating and painting inside. The truck which has been in service 12 years needs repairing and painting.

### THE FIRE ALARM TELEGRAPH.

The fire alarm telegraph has been maintained in the most excellent condition and has rendered effective service throughout the past year. The striker formerly on the First Parish church has been changed to the Congregational church and has given general satisfaction. 13 bell alarms and 340 test blows and school signals have been sent out correctly, There has been one new signal station added to the system located on Highland avenue near Newton line. Key boxes have been placed on three of the signal stations I would recommend that signal station No. 82 be changed from its present location to the corner of South and

Charles River St. and the line extended to Grove St. and a signal station located in th e vicinity of Mr. Geo. A. Alden's residence as there has been two hydrants located there the past summer. which cover a large amount of valuable property.

INFORMATION TO THE PUBLIC.

Before ringing in an alarm be sure that a fire actually exists. Do not give an alarm for a fire seen at a distance, as all needless alarms are an expense to the town and should be avoided.

To give an alarm pull down the hook in the box once, without jerking, and let go. Wait at box and direct the firemen to the fire.

For a brush fire strike ten blows with the key and then pull down the hook, but never pull in alarm first for a brush fire.

After unlocking the box do not attempt to take out the key, for no one but an engineer can release it, as all the boxes have trap locks.

After the first alarm has been rung in, all other alarms or signals are given only by the engineers.

Never give a second alarm for the same fire without an order from the Chief Engineer or Assistants.

Citizens are earnestly requested to keep themselves informed as to the location of keys. Signs over the boxes will give the desired information.

CAUTION TO PERSONS HOLDING SIGNAL KEYS.

Never open or touch the boxes except in case of fire. Be sure your station is locked before leaving it. Never let the key go out of your possession, except to some responsible person, to give an alarm of fire, and be sure the key is returned. If you remove from your house or place of business, return the key to Chief of Fire Department.

# TOWN OF NEEDHAM

## REPORT

OF THE

# SCHOOL COMMITTEE.

FOR THE YEAR 1894.

The close of 1894 completes the first full calendar year since the supervision of the schools of Needham was committed to a single officer appointed expressly for that purpose. The departure made by the town sixteen months ago in the appointment of a superintendent for our schools has been now sufficiently tested to judge somewhat of the wisdom of the movement. The experiment of uniting with the town of Natick in the employment of a superintendent has proved quite as successful as it was anticipated it would. So far the arrangement has worked exceedingly well and our schools are enjoying its benefits.

That the committees of the two towns were fortunate in their selection of a person to fill that position is unquestioned. Since Mr. Parlin's appointment as superintendent our schools have received their full share of his time and attention, and his constant aim and untiring efforts have been for their upbuilding and advancement. Such changes as he has considered it necessary to make have been accomplished with as little friction as possible, and in such a manner as to meet, in every instance, with the hearty approval of the entire board.

For a detailed statement of what our schools have been doing the past year, what is their present condition and such statements and suggestions in relation thereto, as the committee deem necessary or proper to promote, their interests we would respectfully ask your careful perusal of the superintendent's second annual report herewith presented.

The total of the appropriations made by this town the past year, including the income received from the state school fund, is $13,356.84. The total amount expended during the year is $13,371.00 as against $13,252.94 spent the year previous.

The appropriation of $100 made by the town for "repairs of school houses" was found to be insufficient for the work required and after careful consideration the entire appropriation was expended in repairs, made under contract, upon the Avery

school building at Highlandville. The contemplated repairs needed upon other buildings have been necessarily left undone. These should be made the coming year and we would recommend that the sum of $200 be appropriated for that purpose or what would be better, that this sum be added to or included in the appropriation which may be made by the town for incidentals.

We recommend the following appropriations for the coming year, $11,800 for schools, including the salary of superintendent, $900 for incidentals including repairs, and $700 for books and supplies. No appropriation was made last year for painting the outside of any of the school buildings and their present good condition will warrant the town in again postponing action in this particular until an other year.

The high school graduation exercises took place in the town hall on Wednesday evening, June 27th, when a class of ten young ladies and gentlemen having creditable "completed the course of studies prescribed for the Needham High school, and sustained an honorable rank for scholarship and deportment," were awarded diplomas. Their names are Emma Amanda Allen, Eva Chamberlain, Alice Honora Eberhardt, Eliza Frances Fox, Nellie Maria Gilfoil, Walter Norman Hart, Frederic Alexander Jones, Lottie May Morgan, Emma Nelson Pond, and Louise Katherine Smith.

The census which the school committee are required to have taken in the month of May, shows that there were at that time 284 boys and 289 girls belonging to the town of Needham between the ages of five and fifteen years, an increase of sixty nine over last year and of ninety-four over the year previous.

Respectfully submitted for the committee,

EMERY GROVER,
Chairman.

# ANNUAL REPORT

OF THE

# SUPERINTENDENT OF THE PUBLIC SCHOOLS

## OF NEEDHAM.

*To the School Committee:*

I herewith submit my second annual report of the public schools of Needham.

### Rank and Promotion.

This question of promotion is an old and troublesome one. To demand just as much from the dull child as from the bright one and to keep them together upon the same work for a year is wrong. The following plan, according to which we are now working, seems best adapted to our present condition.

Each month the teachers are required to record their estimate of the character of the work of each pupil in each study together with a record of his attendance and deportment. The estimate is supposed to be made after careful thought, without hurry and without any reference to previous records. There is no attempt at percentages for that method assumes an accuracy which every experienced teacher knows is impossible to attain. H is an *honor* mark and signifies that the pupil's work has been continuously of the highest character. Few secure this mark and those few not often. E, signifies *excellent*; G, *good*; F, *fair*; P, *poor* and V *very* poor. The work of two pupils receiving the same mark may differ considerably, the aim being to indicate the *quality*, not the *degree* of the quality of work. Cards with these estimates marked upon them are sent to parents every four weeks. Sometimes pupils and even parents feel that the teacher's estimates, are not quite right; but they must remember that they are the *teacher's* estimates, not any one else's, that she is in the most favorable position to give a fair estimate and that she naturally wishes her pupils to have a good record. If she makes any mistake, it probably will be in giving too high a

mark. These estimates are based chiefly upon the pupil's daily work although tests, except those given by the superintendent, are taken into account.

The reasons for keeping such a record are, to inform parents in regard to the work and conduct of their children, to show the pupils how they stand according to the best judgment of the teacher, to enable them to compare the results of their efforts from month to month and chiefly to aid in determining the pupil's promotion.

But when should a pupil be advanced to a higher grade? In my opinion, when his educational interests will be better promoted by the work and associations of that grade and not until then. The bright child should not be kept back on account of his duller classmates, nor should the dull pupil be promoted to a position unfavorable to his best interests on account of his quicker companions. Dullness is no disgrace, but to promote a pupil to a grade for which he is obviously unprepared and in which he will be more heavily handicapped, is not only unwise but unkind.

Heretofore the rate of class advancement has been too slow for the brightest pupils and too rapid for the dullest, a year, except an occasional promotion over the work of an entire grade, being required of all alike for doing the work of each grade. The quick and the slow, the industrious and the inattentive, the precocious and the immature, have all been required to travel at the same pace. The following plan has been adopted in the hope of diminishing these inconsistencies.

The brightest pupils are allowed to fix the rate of progress during the first half-year and the class goes over all the work of the grade in that time. At the middle of the year the class is divided into A and B sections, the A section containing those who have done the work satisfactorily and the B section containing the rest. The B section goes back to review the first half-year's work, new material being used and more attention being given to details, while the A section is promoted to join the B section of the next grade, thus being able to do the work of two grades in a year without skipping anything. The A section will average about eight per cent of the pupils. At first it would seem unwise to take the dull pupil over the work so rapidly the first half-year, but tests made elsewhere have convinced me that those pupils get a general although indefinite conception of the work which comes out during the last half year into clearer relief, even, than under the former method. By this plan the bright pupil is provided for throughout the year. It is also favorable to the pupil who failed to be promoted the preceding year, for it gives him a quick review of the year's work and he is usually prepared for promotion at the middle of the next year. The semi-annual promotions are made in the grades from the fourth to the ninth only. The plan is not applicable to the primary grades and

the high school, but under it, it is possible for a bright healthy pupil, without skipping any grade, to enter the high school three years earlier than under the old plan. And he will not be overworked for he will spend only about one half as much time as the slow pupil, on each subject of the course of study which is prepared for the average pupil. He is simply allowed to march and not compelled to mark time. If, however, a parent objects to having his child promoted twice a year, the child should be allowed to remain in a single grade.

Pupils completing satisfactorily the grammar school course are given a certificate which admits them to the entering class of the high school without examination.

It seems to me feasible and best to abolish the ninth grade in the Parker, Dwight and Eliot schools as has already been done at the Harris, and to allow the ninth grade pupils to attend either the Avery or Kimball grammar school. It would be a decided advantage to the pupils and to the schools. At present there are no pupils of the ninth grade in either of these three schools and there never are more than two or three. By going to the village schools the pupils would become members of a class sufficiently large to make the work interesting, would receive more of the teacher's time and generally would be much better prepared for the high school, while their former teachers, being relieved of one class, would be able to devote just so much more time to the pupils who remained.

## Spelling.

I am well aware that upon the subject of spelling I do not hold the current popular opinion, for it is quite the fashion to give only incidental attention to spelling in connection with other subjects. I would give this incidental attention and would also have a special daily exercise in which the pupil's attention is called to the form, pronunciation and meaning of a few new words, practice is given in writing and defining them and, by means of prefixes and suffixes, in making derived words. By mastering a new word the pupil secures the key to new thought. Much is said about "getting the thought," but words are the elements of thought. Unless this word-study be made systematic much time will be wasted and the really important words will be neglected. The first thing needed is a suitable list of words, for no one would think of teaching all the words of our language. This list should consist of a few thousand of the commonest words in their simplest form and should be carefully graded. If the simplest form of a word be learned and some attention be given to prefixes, suffixes and vowel-changes, the learner becomes master not only of the spelling but of the meaning of nearly all derived forms. Thus the word *accept* is the key to *accepts*, *accepting*, *accepted*, *acceptable*, *acceptably*.

*acceptableness*, *acceptability*, *accepter*, *acceptor*, *acceptant*, *acceptance*, *acceptancy*, *acceptation*, *acceptive*, *unacceptable*, etc. to the number of twenty or more.

I have spent much time in selecting and grading words for spelling and, although the grading is not completed, the lists are being used in our schools according to the following plan:

Twenty new words are placed on the black-board in front of the class every Monday morning and are allowed to remain there one week. Spelling is largely a question of form which is taken in through the eye. For a week these word are before the eye of the pupil and are impressing their form upon his mind. This is not all, for the teacher each day calls his attention particularly to five of the words, teaching carefully their peculiarities and meanings, and has him write them repeatedly so that their forms may become impressed upon his muscles also, for written spelling made perfect is automatic or unconscious muscular action.

The next morning without further study the class is required to write the five words and to use them in original sentences, and, on Monday morning, to write and define the twenty words of the preceding week. In the lower grades the words are both written and spelled orally, in the upper grades, occasional oral reviews are given.

No word appears twice upon the lists so the pupils make new acquisitions each week. They master about eight hundred words a year which means over six thousand at the end of the grammar school course. But as these are chiefly key words they will actually have command of about twenty-five thousand forms.

## Reading.

During the fall, reading was the subject of special study and the one discussed in most of the teacher's meetings. We aim to secure three results in teaching this subject.—(1) to develop the ability to gather thought from the printed page with facility. (2) to fix the reading habit and (3) to establish a love for good reading. We do not try to produce elocutionists or actors. In the primary grades the child masters the mechanical difficulties of the art,—learns to read,—and in the upper grades he reads for information, for pleasure, to interpret an author, and to develop a good literary taste—he reads to learn. When a child has learned to read he has acquired a new power, holds the key to a new world—the world of literature, bad as well as good. To teach him to read without helping him to know and love good literature is inconsistent and open to grave questions. It is not enough for the school to place in his hand the key, it should go further and unlock the door and give him a pleasant introduction to literature and stay with him until he has made the acquaintance of a few of the best writers. Give him the best the language affords, only let it be adapted to his stage of development. It would be

a great mistake to limit the child's reading to the books we most enjoy. A book is no less a classic simply because we have outgrown it. The child should be allowed to feast among myths, fables and adventures, only let the stories be the purest and best the race has produced. We may call it nonsense but it is health and happiness to his mind. The fact is, Mother Goose fosters poetry and music, myth is not only the ancestor of history but the mother of philosophy and fable has always been a potent teacher of righteousness. I emphasize this kind of reading, not because I think it should constitute the child's only reading or even a large part of it but because of unfavorable criticism. If you wish the child to dislike reading or to seek the intoxication of vicious literature, ignore his tastes, disregard his imagination and give him only logic and facts plainly stated. Well-fed children are nauseated by the filthy refuse which starving ones eagerly devour. Often through our ignorance of the child's real nature and needs we bring about the very results we are most anxious to avert. In the development of the child's tastes and modes of thinking he lives over the mental history of the race from infancy to civilization and his reading should be adapted to his stage of development.

The following books have already been introduced :—Scudder's Fables and Folk Stories, Hans Andersen's Stories, Hawthorne's Little Daffydowndilly and Other Stories, Hawthorne's True Stories from New England History, Hawthorne's Tanglewood Tales, Longfellow's Songs of Hiawatha, Dicken's Christmas Carol and Cricket on the Hearth, Longfellow's Evangeline and Irving's Essays from the Sketch Book. Of course these do not constitute all of the school reading. Several primers, first second and third readers are used in the lower grades and often advanced readers in the upper grades. But we hope soon to be able to supply all classes above the third grade with classic English for *oral reading* andscientific, geographic. and inform ition readers for *silent reading*. During the year there has been a decided improvement in the reading. It is better taught in all grades, the pupils and teachers enjoy it much more, the improvement is more rapid, the aims are higher and more definite and the results will be more lasting and beneficial from the character of the reading matter. Reading is the most universal of the school arts and stands first in importance not so much because of its relation to successful work in other branches as of its influence upon life and character.

## Vertical Writing.

If all teachers in the elementary schools were asked what subject they most dislike, the majority would answer "penmanship," and if all physicians who have looked into the matter were asked to name the most harmful feature of the school work, the ma-

jority would answer, "the positions assumed by the pupils while writing." The first answer would indicate that something is wrong, the second would declare it and we are bound to discover and remedy the evil if possible. At the beginning of my investigation I was decidedly prejudiced against vertical writing, but, after continuing my investigation for more than a year, I was thoroughly convinced not only of its superiority as a system but of its better adaptation to school use. In the first place it is the natural mode of writing—the hand the learner naturally adopts and the one in universal use up to the sixteenth century. Slant must be taught and it is almost the unanimous testimony of primary teachers that it is the hardest part of writing to teach successfully. Again, it is more legible and is generally used in copying and engrossing where absolute legibility is required. It is more economical of space, material and energy. A simple test with letters of the same height will convince anyone that more vertical letters can be written in a given space than slanting letters. It is the hand one instinctively adopts when his space is very limited. The pen will travel over a line about thirty percent shorter and at a cost of thirty percent less muscular and nerve energy. For most persons this may not be a matter worth considering, but for those who earn their bread with their pen it is not insignificant. Many claim that the vertical hand is less rapid than the slanting hand. If the pen travels only seventy percent as far in vertical writing as in slanting, the same rate of motion must enable the writer to trace the word in less time. The mathematics of the question are certainly on the side of the upright hand. That there is nothing about upright writing which tends to diminish speed was well demonstrated by the experiment of Mr. D. T. Ames, editor of the Penman's Art Journal, with a large number of operators in the Central Office of the Western Union Telegraph Co., where rapidity and legibility are absolutely indispensible. His test, made without the knowledge of the operators, showed that most of them write a vertical or nearly vertical hand.

But the reason above all others for using vertical writing is hygienic. It is a well known fact that shortsightedness, almost exclusively, and ninety percent of curvature of the spine, not arising from special disease, are developed during school life. And in the opinion of some of the best oculists and orthopedists, whose opinions are based upon observations in the school-room, the bad position while writing is chiefly responsible for these evils. These specialists also agree that vertical writing seems best adapted to the right physical conditions of the eye and spine. In Europe, where the investigation began much earlier and has been most thorough and scientific, vertical writing has been widely introduced into the schools. It is now being very rapidly adopted by American educators; and I have yet to learn of its discontin-

uance in a single school where it has been tested. Teachers who objected to its introduction into their schools soon became its enthusiactic advocates because, "It is so much easier to teach and the children write so much better." Contrary to my expectation the older pupils find little difficulty in changing from a slant to a vertical hand and in cases where the former hand was very poor the results of the change have been exceedingly gratifying. I recommend its adoption for all grades.

## Drawing.

Thus far creditable work in drawing has been done in most of the schools without the aid of a special teacher. I have directed the work and the teachers have carried it on intelligently and very satisfactorily, but the time has now come when, in order for drawing to receive the attention it should receive and for the children to realize all its benefits, the work requires the services of a specialist. This is the only kind of manual training in our schools. It is of the highest educative value and should receive as much attention as music.

I recommend that the services of a competent supervisor of drawing be secured for one day each week, beginning next term. The expense will be small, considerably less than at present for music and less than the amount formerly paid the assistant in the Avery Primary school.

## Music.

I judge the music is in the hands of competent supervisors. Perhaps the teachers have at times been hindered a little in their work by the irregularity of the supervisor's lessons.

I herewith submit the report of the supervisors of music:

*F. E. Parlin, Superintendent of Schools.*

Dear Sir,—

We are pleased to report progress in our department. We feel that in many ways a real gain over last year's work has been made.

Our work in the higher classes has heretofore been seriously retarded through our inability to accomplish what we desired in the lower primary grades.

This year, however, owing to an improvement in the arrangement of classes etc., we are enabled to realize better results than ever before and, if the time allotted music is spent in careful drill upon the work left by the supervisor, we are confident that we shall soon be enabled to realize the fine results we have so earnestly desired. In the intermediate and grammar grades, good work has been done and we are gratified to note the interest shown by teachers and pupils.

Our work in the high school during the early part of the fall

term, was to quite an extent, of a technical nature, but a little later the different sections were brought together for practice in part singing and beginning with the month of January, the pupils will have weekly drill in chorus work.

We would call particular attention to the fact, that notwithstanding the multiplicity of studies in our schools today, music, so far from taking time from studies often claimed to be of greater importance, develops and stimulates the mind and really does more for other studies than we are aware.

Not only does it develop mental activity but it appeals to the soul and develops in the pupil those qualities that make him better and purer.

Aside from all this, singing is a physical exercise that wonderfully increases lung power and thus promotes health and strength.

In closing, we would express to you our appreciation of your assistance during the year and we also desire to thank the committee and teachers for their help and cooperation.

Respectfully submitted,

H. J. Whittemore,
Mary E. Whittemore.
Supervisors of Music.

## Teachers.

The only changes in the corps of teachers during the year were in the Avery and High schools, Miss Terry taking the place of Miss Willgoose and Miss Graves in the primary room of the former and Miss Mills succeeding Miss Pecker in the latter.

Some of the work has been new to the teachers but, with very few exceptions, they have taken hold of it intelligently and in the spirit of the true teacher. They are to be commended for their hearty co-operation and faithful effort to do satisfactorily all that has been suggested to them. Many of our teachers are doing excellent work. Their scholarship is ample, their preparation careful, their discipline wise, their teaching skillful, their results gratifying, their spirit admirable, their thought and effort untiring. It is a pleasure to work with such teachers and fortunate are the children who come under their instruction.

A very few teachers make hard work in applying new and systematic methods. They do not easily break with old habits. Often there is a conspicuous lack of preparation, of discrimination, of aim and enthusiasm in their work. Their ambition for professional growth and improvements is not quite what might be desired or expected.

As occasions for the election of new teachers arise only applicants who have real professional training should be eligible. The State Board of Education by a plan for the examination and certification of teachers, adopted Dec. 14, 1894, has fixed a stan-

dard which recognizes teaching as a profession. The board very properly makes character, scholarship and professional skill the necessary qualifications and it will be fortunate for the children of the Commonwealth when these are everywhere demanded as indispensible. Frequent changes in the teaching corps are bad for the schools and should be avoided as far as possible, but when a teacher becomes professionally stagnated or conspicuously fails to meet the needs of the children there can be no adequate reason for retaining him or her.

On the other hand teachers must be protected from the unjust and often cruel charges of pupils and parents. Of course teachers, like all other people, make mistakes and should be willing to correct them, but, in nine out of every ten cases of trouble between pupils and teachers, the pupils are the aggressors, and too often the fault is aggravated and the trouble greatly augmented by the unwise counsels of parents. There is no motive for a teacher to abuse a pupil. She has a sincere interest in his welfare and is ambitious for his advancement. In fact, the average teacher in the instruction and government of her school exercises far more patience, justice and good sense than the average parent in the home training.

## High School,

A careful examination of the course of study of the high school led to the opinion that too much time was being given to foreign languages and too little to English and history. Therefore a new course was adapted and the school began work at the opening of the fall term according to the following plan:

### Courses of Study.

| First Year. | | Second Year. | |
|---|---|---|---|
| Latin, or French, (or German), | 4 p. | Latin, or French, (or German), | 3 p. |
| English, | 4 p. | Greek, or history, | 3 p. |
| Algebra, | 4 p. | English, | 3 p. |
| History, | 3 p. | Geometry, | 3 p. |
| | | Physics, | 3 p. |

| Third Year. | | Fourth Year. | |
|---|---|---|---|
| Latin, or German, (or French), | 3 p. | Latin, or German, (or French) | 3 p. |
| Greek, or History, | 3 p. | Greek, or {physiology ½ yr., geology, ½ yr.,} | 3 p. |
| English, | 3 p. | History, | 3 p. |
| Mathematics {algebra ½ yr., geometry ½ yr.} | 3 p. | English, | 3 p. |
| Science {astronomy ½ yr., botany, ½ yr.,} | 3 p. | Chemistry, | 3 p. |

The above outline presents four distinct courses as follows:

I. The Classical, consisting of three foreign languages (two ancient and one modern), English, mathematics, some History

and some Science.

II. The Latin Scientific, consisting of two foreign languages (one ancient and one modern), English, Science, some Mathematics and some History.

III. The Modern Languages, consisting of two foreign languages (both modern), English, Mathematics, History and Science.

IV. The English, consisting of Latin, English, Mathematics, History, and Science.

Each course requires at least three periods of work a day, or fifteen periods a week, and four years for its completion.

All electives or changes in studies should be made subject to the approval of the principal of the school.

I herewitn submit the Principal's report:

*F. E Parlin, Superintendent of Schools*:

I have the honor to submit to you my second annual report of the work of the high school.

### Studies.

The most important event of the year with us has been the introduction of the new course of study which went into operation at the beginning of the school year. The inconveniences which at first arose from this change in our curriculum have gradually worn away, and I think will have entirely disappeared by another year. The new course of study is not only more practical than the old, but it is much more satisfactory to the pupil, as he can now pursue one of four different courses open to him and elect some of his studies. Our school is now especially strong in the Sciences and in English, and it is to be regretted that the limited number of our teachers prevented the study of Mathematics from being extended to four years instead of to three.

### Attendance.

Though our loss in scholars during the year has been somewhat greater than usual, and though our school is smaller than for several years on account of the size of the two last entering classes—they containing about one-half the usual number, — yet the attendance has been better than for several years, as the tables of statistics will show, and during the past year, there has been the largest number of scholars not absent for one, two and three terms since my connection with the school, which is also the largest number, I believe, in the history of the school.

### Deportment.

The plan which I outlined in my last report of putting scholars upon their honor has worked well, there being really very little restraint laid upon them and yet a tacit understanding of the limits of their acts, beyond which they have seldom gone. Indeed I have not had a single case of discipline in the high school

for the past year. As a general thing the scholars govern themselves, not the least important of the lessons taught them being that of self control.

### Improvements.

During the year our physical laboratory has grown by the addition of approved apparatus purchased in part by the town and in part from the proceeds of an entertainment given by the class of 1897. Many pieces of good working apparatus have been manufactured by the school at only a small portion of the prices charged by the dealers. Through the generosity of the citizens a fine stereoptican has been procured affording an attractive and convenient means for the illustration of almost every subject. Last April with appropriate exercises five (5) shade trees were planted in the school yard and these will no doubt be followed by others.

### Suggestions.

It seems to me that more time should be set apart for declamations, etc. , as the time now given to these exercises has to be taken after school hours while they are really a part of the school work. If the pupils of our high school could be given short addresses from time to time, say once a week, on practical topics by citizens of our town and by others, it would be a great stimulus, and would bring the pupils into closer relations with the affairs of every day life and our citizens to a closer observation of the workings of the school.

### Conclusion.

We have now, and have had for some time, three pupils from out of town attending our high school. This speaks well for the school as it is much better to have pupils come in than to let them go to other towns. Boston University has volunteered to admit our graduates who are fitted for college to its classes on certificate, and other colleges will no doubt be willing to do the same. Two of the members of the graduating class are intending to enter college next fall, one at Wellesley and one at Harvard. It seems to me then that the outlook is favorable, and that the same degree of success which has attended us in the past will continue with us in the future. This success I attribute largely to your own earnest assistance and encouragement and that of our School Board who have labored so zealously, for the welfare of our school.

Respectfully submitted,

C. L. Judkins. Principal.

### Text Books and Supplies.

I wish to say just a word in regard to the cost of text books and supplies as the expense may seem to some needlessly large.

The average life of a text book is about three years. To reckon the original cost of the books now in the hands of the pupils at $2.75 per pupil would certainly be within bounds, for while the cost in the lowest grades would be much less, in the upper grades it would be much more and in the high school it would be fully double that amount. But $2.75 a pupil means about $1800 for the cost of the text books in all the schools. One third of these must be replaced by new ones every year at a cost of about $600, which is less than 93 cents per pupil, certainly a low figure. So far we have not included the cost of supplies,—paper, pencils, ink, pens, slates, etc. No one would say an allowance of 20 cents a year to each pupil for all these supplies is extravagant. At 20 cents per pupil the amount required for supplies would be about $130, making a total of $730 and an annual cost of $1.12 per pupil which is a very conservative estimate and a figure that would not long continue to keep the pupils satisfactorily equipped.

Whatever is expended for general supplies, maps charts, apparatus and books of reference, will increase the above, sum by the amount of the purchase.

## Needs.

The outbuilding at the Avery school should be enlarged and better adapted to the needs of the pupils, especially those of the primary grades. This change should be made before another winter.

A flag and suitable staff are needed both at the Dwight and at the Parker school. A few reference books in the grammar schools are very much needed.

---

In conclusion I wish to thank this Board for its continued support and constant cooperation. I have worked upon the hypothesis that Needham desires the best schools she can secure for the money she expends. The policy adopted for the development of the schools has been the same that would have been adopted had I expected to remain in charge of them many years. I have tried to build from the foundation.

The courses of study and the methods of instruction are not like those you and I were accustomed to in our school days, but I believe they are in harmony with the best educational thought of today and that the schools have made creditable advancement during the year.

Respectfully submitted,

FRANK E. PARLIN.

*COMMONWEALTH OF MASSACHUSETTS.*

Norfolk, ss.

To William Wragg, a Constable of the Town of Needham, in said County, Greeting:

In the name of the Commonwealth aforesaid you are hereby required to notify and warn the inhabitants of the town of Needham, qualified to vote in elections and in town affairs, to meet at the Town Hall, on Monday, the fourth day of March next at one o'clock in the afternoon, then and there to act upon the following articles, viz.:

Article 1. To choose a moderator to preside in said meeting.

Article 2. To hear and act on the reports of town officers and committees.

Article 3. To elect the following officers for their respective terms of office: town clerk, two selectmen for one year, one overseer of the poor for one year, two assessors for one year, town treasurer, collector of taxes, two auditors, two constables, one member of school committee for three years, one water commissioner for three years, two trustees of the public library for three years, and all other necessary town officers, and to vote "yes" or "no" in answer to the question:

"Shall license be granted for the sale of intoxicating liquors in this town?"

ARTICLE 4. To see what action the town will take in regard to unexpended balances and deficiencies.

ARTICLE 5. To see what disposition the town will make of the money received from dog licenses.

ARTICLE 6. To see if the town will accept the list of jurors as prepared by the selectmen and published in the town reports.

ARTICLE 7. To see if the town will accept the relocation and widening of that part of Hunnewell street between Highland avenue and Webster street as laid out by the selectmen.

ARTICLE 8. To see if the town will accept the extension of Pickering street from May street to Kingsbury street so called.

ARTICLE 9. To see what action the town will take in regard to borrowing money in anticipation of the collection of taxes.

ARTICLE 10. To see if the town will issue its bonds to the amount of five thousand dollars under and according to the provisions of Chap. 107 of the Acts of 1888, Chap. 35 of the Acts of 1891, Chap. 258 of the Acts of 1892, and Chap. 107 of the Acts of 1893.

ARTICLE 11. To see what action the town will take in regard to borrowing money in anticipation of taxes, and issuing its water loan bonds.

ARTICLE 12. To see if the town will vote to have the hall and other apartments in May building lighted by electricity, on petition of George W. Southworth and others.

ARTICLE 13. To see what sum the town will appropriate for the improvement of Greendale avenue, on petition of Andreas A. Klauer and others.

ARTICLE 14. To see if the town will vote that no elected town officer shall hold a salaried position under

the board of which he is a member, on petition of Aaron Twigg and others.

ARTICLE 15. To see if the town will vote to reimburse the estate of Mark Lee, for money paid out as chairman of the board of health.

ARTICLE 16. To see how the town will have its taxes collected and fix the compensation therefor for the current year.

ARTICLE 17. To see if the town will vote to have the reports of its officers and the proceedings of this and other town meetings printed.

ARTICLE 18. To see if the town will vote such sums of money as may be necessary for all or any of the purposes mentioned in the foregoing articles, or as may be required to defray the expenses of the town for the ensuing year, and to act upon the recommendations of the committee on appropriations appointed at the last town meeting.

The polls will be opened at one o'clock in the afternoon, and may be closed at five o'clock.

And you are directed to serve this Warrant by posting copies thereof by you attested in not less than twenty public places in said town at least seven days before the time of holding said meeting.

Hereof, fail not, and make due return of this Warrant with your doings thereon, unto our Town Clerk on or before said day and time.

Given under our hands and the seal of the town of Needham, aforesaid, this twentieth day of February, A. D. (1895) eighteen hundred and ninety-five.

{ TOWN SEAL }

ARTHUR WHITAKER,
EDGAR H. BOWERS,
FRANCIS L. FULLER,

Selectmen of Needham.

# OFFICER'S RETURN.

February 23, 1895.

Norfolk, ss.

By virtue of the within warrant, I have this day notified and warned the inhabitants of the town of Needham to meet at the Town Hall, as within directed, by posting true copies of this warrant, by me attested, in more than twenty public places within said town, more than seven days before the time of holding said meeting.

WILLIAM WRAGG,
Constable of Needham.

A true copy.—Attest: Charles C. Greenwood,
Town Clerk.

# Record of Annual Town Meeting

March 4, 1895.

A meeting of the inhabitants of the town of Needham, qualified to vote in elections and in town affairs, was held pursuant to the foregoing warrant, in the Town Hall, in said town, on Monday, March 4, A. D. 1895.

Article 1. Arthur Whitaker and Charles A. Lewis were appointed tellers by the town clerk to aid him in checking the names of voters and counting the votes for moderator, and they were sworn to the faithful discharge of their duties by the town clerk.

Emery Grover was chosen moderator by ballot, and the check list was used.

Art. 2. Voted that the reports of town officers as printed and distributed, be accepted.

The chairman of the water commissioners made a verbal report that it was not advisable to erect a building for the engineer of the water department at the present time, the question having been referred to the board at a town meeting held April 7, 1894. Voted that the report be accepted.

Art. 3. Voted to proceed to ballot for a town clerk for one year, two selectmen for one year, two assessors for one year, one overseer of the poor for one year, a town treasurer for one year, one member of school committee for three years, one water commissioner for three years, two trustees of public library for three years, a collector of

taxes for one year, two auditors for one year, and two constables for one year; also to vote "yes" or "no" upon the following question: "Shall licenses be granted for the sale of intoxicating liquors in this town?" all on one ballot.

The selectmen having appointed Albert M. Miller, Francis T. Probert and Edwin M. Grover as ballot clerks, they were sworn to the faithful discharge of their duties by the town clerk. The ballots prepared for use at this election by the town clerk were then delivered by him in a sealed package to said ballot clerks and their receipt taken therefor. Cards of instructions were then posted in the voting compartments, and cards of instructions and the specimen ballots were posted in the hall outside of the guard rail.

The following persons were appointed and sworn as tellers by the moderator to aid him in receiving, sorting and counting the votes cast under this article, viz.: Charles Evens, jr., George W. Southworth and Arthur Whitaker.

The ballot box furnished by the secretary of the commonwealth for use at elections was opened publicly by the moderator and shown to be empty. The box was then locked, and the key to the lower part delivered to William Wragg, the officer in attendance at the election. The polls were then opened, and were kept open until twenty minutes past six o'clock p. m., when, in accordance with the vote of the meeting, they were closed, having been open more than four hours.

At the opening of the polls the ballot box register stood at 0–0–0; at the close, 492.

Additional tellers were appointed by the moderator and sworn by him to the faithful discharge of their duties, viz.: Charles H. Crowley, William H. Wye, Charles F. Berry, Elwyn R. Thorpe, William C. Freeman and Arthur Latham.

The ballots were then taken from the box and audibly counted one by one by the moderator, and the whole number was five hundred and ten (510). The whole number of votes cast by men voters was five hundred two (502). The whole number cast by women voters for school committee was eight (8). The names on the list of men voters which had been checked by the tellers at the ballot box were counted and the number found to be 502. The number of names checked on the list of women voters was 8. The number of names checked on the lists kept by the ballot clerks at the entrance to the voting place was as follows: men, 502; women, 8.

A canvass of all the votes given in was made by the moderator and tellers as required by law. Upon the completion of the canvass of all the votes cast, the result of the voting was declared by the town clerk to be as follows: viz:

ART. 11. Voted that the treasurer be authorized, with the approval of the water commissioners, to borrow on temporary loan such sums of money as may be necessary in anticipation of the collection of taxes, the same to be paid therefrom.

(Passed unanimously.)

ART. 12. Voted that the subject matter of Art. 12 be referred to the selectmen with directions to report to the next annual town meeting full particulars.

ART. 13. Voted that the special attention of the selectmen be called to the subject matter of this article.

ART. 14. Voted that no elected town officer shall hold a salaried position under the board of which he is a member.

ART. 15. Voted that the treasurer be authorized to pay the estate of Mark Lee the sum of $45.50 in full, for balance due on account of the board of health.

Art. 16. Voted that all poll taxes shall be payable on demand, and all other taxes on or before the first day of October. Interest at the rate of one-half of one per cent. a month shall be charged on all taxes not paid on or before the first day of November. The collector shall use the means provided by law for the collection of all taxes remaining unpaid after the first day of December.

(The above paragraph shall be printed on the tax bills.)

Voted that the collector of taxes shall have the same power which the treasurer would have when acting as collector.

Voted that the collector receive his pay when one-fourth amount of warrant is received, and when one-half the amount received, and when three-fourths of amount received, and the balance of pay when the full amount has been collected.

If in the judgment of the collector, that in consequence of removal, or any other circumstance, any tax should be collected before the first of October, he is fully authorized to serve his warrant in the collection of such tax at any time. The collector shall guarantee the full amount of all taxes legally assessed and committed to him for collection and shall be held to pay the town treasurer the same, with any interest that may accrue thereon (except such sums as may be abated by the assessors;) he shall pay the said taxes and interest from time to time, as he collects the same, and shall pay the full amount of all taxes committed to him, with the accrued interest, on or before the first day of April, 1896. The compensation of the collector shall be one per cent. on all taxes and interest collected by him and paid to the treasurer.

Art. 17. Voted that the auditors cause the valuation list and the financial and other reports of town officers and committees, together with their own report on the same, to

be printed and delivered to the selectmen for distribution as soon as possible after the first of January.

Voted that the town clerk cause to be printed official copies of the proceedings of this meeting, one of which he shall send to each officer of the town within two weeks after the final adjournment of this meeting, and shall deliver one copy to any voter or tax payer in the town who may apply for it, and that the town clerk furnish a copy of the record of each and every town meeting held during the year for printing, so that it may be bound with the annual report of town officers.

Art. 18. The following appropriations were voted under this article, the recommendations of the committee on appropriations being first presented, and each item voted upon separately, viz. :

| | |
|---|---|
| Schools, including salary of superintendent, | $11,800 |
| School incidentals and repairs, | 1,200 |

In pursuance of the foregoing warrant, the inhabitants of the town of Needham, qualified to vote in state elections, met in the town hall in said town, on Tuesday, the fifth day of November, in the year one thousand eight hundred and ninety-five, it being the Tuesday next after the first Monday in said month, and were called to order at six o'clock in the forenoon by Arthur Whitaker, chairman of the board of selectmen, who read the warrant calling said meeting and the return thereon of the officer who warned and notified the inhabitants.

The selectmen having appointed Edwin M. Grover and Frank T. Probert as ballot clerks, they were sworn to the faithful discharge of their duties by the town clerk.

The package containing the "first set" of ballots received from the secretary of the Commonwealth was then delivered by the town clerk to the chairman of the selectmen who publicly opened the package and delivered the ballots to the ballot clerks. Cards of instructions were then posted in each of the voting compartments in accordance with the provisions of Section 149, Chap. 417 of the Acts of 1893.

Cards of instructions and the specimen ballots were posted in the hall outside of the guard rail, as required by said act.

The ballot box furnished by the commonwealth for use at elections was then publicly opened and shown to be empty, and was examined by the selectmen and town clerk and found to be empty. The box was then locked and the key to the lower part delivered to William Wragg, the officer in attendance at the polling place.

Charles E. Stanwood having been appointed a teller by the selectmen was sworn to the faithful discharge of his duties by the town clerk.

The polls were then opened for the reception of ballots and were kept open until half past four o'clock in the afternoon when by vote of the meeting they were closed. At the opening of the polls the ballot box register stood at (o).

Edgar H. Bowers was appointed by the selectmen as an additional ballot clerk and was sworn to the faithful discharge of his duty by Arthur Whitaker the presiding election officer.

Robert E. Ames was appointed by the selectmen as an additional ballot clerk and was duly sworn by the town clerk.

Charles W. Mercer having been appointed a teller by the selectmen, was duly sworn by Francis L. Fuller, the presiding election officer for the time being.

The selectmen appointed the following as tellers, viz:

Edwin M. Grover, George A. Adams, George W. Poggi, Robert E. Ames and Francis T. Probert and they were sworn to the faithful discharge of their duties by the town clerk.

During the voting at fifty-five minutes past one o'clock the ballot box was opened with the unanimous consent of the selectmen and town clerk, and three hundred ballots cast by men voters were taken from the box. At the close of the polls the ballot box register stood at 526. As the ballots were taken from the box they were audibly counted by the presiding election officer and the whole number was five hundred and forty-five. Sixty-six of the number being the votes cast by women on the municipal suffrage question.

The names on the list of men voters checked at the ballot box were counted and the number was found to be 479. The number of names checked on the list of women voters was 66. The number of names checked on the voting lists kept by the ballot clerks at the entrance to the voting place was as follows: Men, 479; women 66.

A canvass of all the votes given in was made by the election officers as required by the election act of 1893 and amendments thereto, the blank forms furnished by the Secretary of the Com-

monwealth being used. Upon the completion of the canvass of all the votes cast and the whole number duly sorted, counted and recorded, public announcement thereof was made in open meeting by the town clerk and was as follows:

# Annual Report

OF THE

# Selectmen and Overseers of the Poor

---

The selectmen respectfully submit the following as a report of their doings for the year ending Dec. 31, 1895:

## HIGHWAYS.

This department has been in more or less of an unsettled state during the past season owing to the several changes of the officer in charge. Our highly esteemed townsman the late C. H. Dewing was re-appointed superintendent in the spring, his long and faithful services as a public official was brought to an end by his failing health and consequent resignation which took effect upon the first of August. Mr. Geo. I. Shedd was appointed as his successor and continued in office until November 1st when D. F. Henderson was appointed for the remainder of the year. One of the most important matters in the care of highways is to keep the road bed at a proper crown with gutters and channels clear for the free and quick passage of the water. If this is

not done the water will work great injury to the streets and require the carting of many loads of gravel which would not be necessary if the gutters were kept clear.

The best results are obtained from this class of work if it is done in the fall of the year after the leaves have fallen. The open weather of last fall and the excellent work that superintendent Henderson was doing in this line induced the selectmen to allow it to continue after the appropriation was exhausted believing that dollars would be saved for every dollar so expended.

Bids for the team work were not called for by the selectmen. A price was fixed and the superintendent of streets was instructed to hire teams where he saw fit. The time has arrived when it would seem to be advisable for the town to own four horses. Employment could be found for them virtually the year round. The serious consideration of this project is advocated.

The matter of permanently locating the stone crusher has been considered and investigations have been made upon the subject, but owing to the numerous demands from other quarters no funds have been available for that purpose. With one exception all of the wooden bridges in the town have been replanked and repaired to a greater or less extent, some of them were found to be unsafe after the appropriation was virtually exhausted which will account in a great measure for the deficiency which the financial report will show. The rebuilding of that portion of Hunnewell street between West street and Highland Ave. upon the relocation, voted by the last annual town meeting, was done from the funds of the highway appropriation. The expense was augmented largely owing to the fact that the new street was built upon a line of a true grade from West street to Highland avenue.

While the condition of our streets has been constantly improving for the past few years, the public demand for better roads has increased in a far greater ratio. If this demand is to satisfied larger appropriations will have to be made.

Greendale Ave. and South street are in need of extensive repairs. We would respectfully call the attention of the incoming board to their condition.

### SIDEWALKS.

The fact that there has been no applications for concrete side-

walks and edgestones, has made it possible to expend the entire appropriation on gravel sidewalks either in the repairing of existing walks or in building new ones.

The practice of building sidewalks upon the application of abutters, where the abutters pay one half the expense, often leads to the expenditure of money which results more in adding a finish to an estate than to any real benefit to the public, more benefit will often be derived by the building of a long continuous stretch of sidewalk as has been done the past year on Nehoiden street. We have now a walk from Needham to the Cemetery and town clerk's office. It was intended to continue the sidewalk on Great Plain Ave. in the same manner to the junction of Central Ave. as the foot traved on that street would warrant the outlay. This should be done the coming season.

## POOR.

Efforts have been made to conduct the affairs of this department economically and at the same time humanely. The cost of maintaining the department is largely beyond the control of the overseer of the poor. Old age and infirmities are constantly adding new cases to the list and large bills from unexpected quarters are constantly being contracted. A perusal of the financial report will prove this statement. Hannah Ricker for a number of years an inmate of the Wellesley almshouse has died during the year. Walter Beebe and Patrick Gilmartin are the present inmates of that institution at the expense of our town. The inmates of insane asylums and other institutions remain the same with the exception of the committal of Francis J. Poyner to the school for the feeble minded. 656 tramps have been put up at an expense of $25.71. The lockup is entirely inadequate to accommodate this large number. Some method should be taken to decrease the number or larger quarters should be provided.

## POLICE.

To comply with numerous and urgent requests night police service was instituted at the village of Highlandville by transferring officer Beaumont Dyson from the Plain to that section and appointing Mr. Geo. Adams as night officer for Needham

village. This additional service has been furnished within the appropriation. The absence of fires and the good order which has prevailed indicates that these officers have done their duty.

### MISCELLANEOUS.

The fact that there has been no heavy legal expenses during the year is a matter for congratulation.

The question of bridging the railroad on High Rock street has not been lost sight of, but owing to the fact that the railroad has been in the hands of receivers and that there was an uncertainty as to the ownership of the road as well, the case has not been pushed by our counsel.

Mr. Henry D. Rodgers who has held the position of superintendent of the electric fire alarm system since its establishment, tendered his resignation during the year and Mr. Charles A. Searcy was appointed to succeed him. The board of selectmen wish to express their appreciation to Mr. Rodgers for the exceptional, faithful and efficient manner in which he, for so many years, has attended to the duties of his office.

The board has granted a franchise to the Needham and Newton Electric Railroad. Said franchise will be found printed in full elsewhere.

The town has maintained its usual reputation as an extremely healthy locality during the past year. No serious outbreak of any contageous disease has occurred. The selectmen acting as Board of Health did not appoint an executive officer known as "health officer." The business of this department was attended to personally by members of the board.

# Electric Railway Franchise.

# FRANCHISE

GRANTED BY THE

# TOWN OF NEEDHAM, MASS.

TO THE

## NEEDHAM AND NEWTON STREET RAILWAY COMAPNY.

---

An order granting to the Needham and Newton Street Railway, the use of certain streets and highways in the town of Needham, for the operation of an Electric Street Railway.

SECTION 1. After due notice and public hearing on the petition of a majority of the Directors of the Needham & Newton Street Railway Company for the location of the tracks of the Company in certain streets and highways of the town of Needham, in the Commonwealth of Massachusetts, it is hereby ordered and decreed by the selectmen of said town that permission is hereby granted to said Street Railway Company, its successors and assigns to enter upon and to construct, maintain and operate a single track railway, with the necessary turnouts and switches, curves and sidings upon and along the following streets and highways in said town, to wit:

Beginning on Chapel street, at the junction of Great Plain Avenue; thence running through Chapel street to Highland Avenue and along Highland Avenue to the Newton line.

Section 2. Said Needham and Newton Street Railway Company, its successors and assigns, are hereby granted the right to use, upon the whole or any portion of its tracks, as the same now or hereafter may be located over said route' as a motive power, electricity supplied to the cars by means of a single overheard trolley wire, the electrical circuit being completed by the rails of the road, suitably connected at their ends, or connected with a supplementary ground wire And for this purpose said Company, its successors and assigns, are hereby expressly authorized and empowered to lay and connect said ground circuit as aforesaid, and to erect and maintain in and along any and all of the public streets and highways upon which the tracks of said Company are herein located, such posts, brackets, cross arms, wires and fixtures as may be required to properly support and maintain the overhead trolley and feed wires.

Section 3. The authority and permission herein granted is subject to the following terms and restrictions, viz :—

(a) The guage of the track shall be four feet, eight and one-half (4 ft., 8 1-2 in.) inches. The Railway Company shall keep that portion of the streets and highways as are included between its tracks and for a distance of eighteen (18) inches outside thereof, at all times flush with the top of track, and shall keep the same in good repair and safe for public travel.

(b) The rails shall be those known as the "T" rails and weighing not less than fifty (50) pounds to the yard. Said rails shall be laid on chestnut or cedar sleepers, said sleepers to be laid not more than thirty (30) inches between the centres, and to be suitable size to firmly hold the spikes for the rails.

The track shall be located in said streets as follows :

Commencing at the junction of Chapel street and Great Plain avenue thence along said Chapel street on the easterly side thereof to Highland avenue thence along said Highland avenue on the easterly side thereof to a point on the northerly corner of Morton street so-called thence in the center of said Highland avenue to a point opposite a private way on the north side of the Methodist church property thence along the easterly side of said Highland avenue to the city of Newton line.

(c) The alignment of said track together with the curves, turnout and switches shall be given by the selectmen of said town, and the tracks shall be laid to conform with the present grade of the street. If, however, at any future time the grade of the street in which the track of the said Railway Company are located is changed then said Company shall at its own expense change its tracks to conform with the same. And wherever the track is located by the side of the travelled part of the said highway, the road bed shall be widened, if necessary, so as to leave fourteen feet (14) in width outside of the track for the use of teams and the general public travel.

(d) At all cross walks and street crossings which are now or may hereafter be provided for foot passengers in the location of the track in the streets, the same material as used by the town shall be used by said Company between its tracks and for a distance of eighteen (18) inches outside thereof; and all street crossings and such curves and turnouts as the Selectmen may designate and the portion of the track in the village of Highlandville, where it shall run in the centre of the street, shall be paved with square granite paving blocks between the tracks and on eighteen (18) inches each side thereof. At and opposite all driveways which may lead to the street on that side thereof on which said track is located, planking or such other material as shall be designated by the Selectmen shall be used by said Company to make said approaches to said streets and over said tracks safe for public travel. All such crossings and driveway approaches to be kept in repair to the approval of the selectmen of Needham, at the expense of said Railway Company.

(e) During the construction of said railway, said Company shall not unreasonably impede public travel on any of the streets or highways aforesaid and all of said streets or highways aforesaid, and all of said streets in which said tracks are to be laid by said Railway Company, which is included between said tracks and for a distance of eighteen (18) inches outside thereof, shall be left by said Company in as good and safe condition as the same may be when the laying of the tracks was commenced, and in event of any street in which said tracks are located are being improved or repaired, the portion of said street and for eighteen (18) inches outside thereof, shall be improved or repaired by said Railway Company so as to conform with the other parts of the street.

(f) The poles used in said construction shall be of chestnut, or hard pine, finished squared and chamfered ; they shall be of uniform size and height. All poles used in such construction shall be placed in or adjacent to the line of the curb of the sidewalk, or otherwise under the direction of the Selectmen. They shall be set not less than six (6) feet in the ground, and kept painted with not less that two (2) coats of paint of such color as the Selectmen may designate. Whereever the location of any pole is in soft ground the Railway Company shall use cement to properly hold the same in upright position. The crosswires or brackets, as the case may be, for the suppport of the trolley wire, shall be attached to said poles at such height as to maintain said trolley wire at every point of suspension not less than eighteen (18) feet above the surface of the street.

(g) The Railway Company shall place and at all times maintain such guard wires as the Selectmen may from time to time require.

(h) Wherever the Selectmen may designate the electric light wires and fixtures shall be removed from the present poles and placed upon poles of the Needham & Newton Railway Company; the expense of said removal to be paid by said Compauy.

(i) All snow or other material placed upon the streets of said town of Needham, by said Railway Company, in consequence of keeping the tracks of said Company open for public travel, or for any other cause, shall be promptly removed by said Railway Company and the whole street left in such condition as to be safe for public travel; and failing to do this within a reasonable time in the judgement of the Selectmen, said Selectmen may cause the same to be removed and charge all expense thereof to the said Railway Company.

(j) The Selectmen of the town, for the purpose of repairing the highways or repairing or extending its water or sewer system, and the Chief Engineer of the Fire Department of said town, in case of fire along the line of said Railroad may take up or obstruct the tracks,or cut the wires of said Company without being liable in damages to said Company, or if the said Company's wires or the track shall be broken or be taken up from any cause connected with the works being performed by the town, or any of the officers or authorized agents, they

shall be repaired by the Company at the Company's expense.

(k) The said Company may trim such trees as shall be necessary for the erection of the wires, but trees shall be trimmed only under the supervision of a competent person, who shall be appointed by the Board of Selectmen, and the expense of whom shall be paid by the Railway Co.

(l) The Railway Company shall at all times provide sufficient and suitable cars and run the same at such intervals as will reasonably and comforably accommodate the citizens of the town.

(m) The said Company shall pay and save said town harmless from all claim and damage resulting to person and property by reason of the construction or use of said track, poles, wires, or other structure, and also from the use of electricity by said Company and said town shall promptly notify said Company of any suit or claim brought against it, and said Company shall defend all such suits at its own expense.

(n) If, in the constructions of said railway, it shall become necessary to remove any fence, or if there shall be left any place with dangerous embankments on either side of said streets then the Railway Company shall erect proper and suitable railings thereat, free of expense to the town.

(o) If it shall be found in the construction of said railway that any bridges or culvarts on the line af said railway are not of sufficient length and strength to safely allow the cars of the Company to go over the same, said Company shall at its own expense strengthen and lengthen the same.

(p) Said Company shall build and maintain catch basins and drains rendered necessary by the construction of said road, wherever and whenever so ordered by the Selectmen.

Section 4. If said Company shall sign a grant, or transfer its rights, or lease its property, tracks, or location within the Town of Needham, to any other person, or corporation, without first obtaining the consent of the Board of Selectmen of said town, the franchise hereby granted, shall be null and void.

Section 5. The said Company shall give bond to be approved by the Selectmen, in the sum of four thousand ($4000.00) dollars, to the inhabitants of said town of Needham,

conditioned upon the fulfillment by said Company of said requirements, before doing any work under this order, and upon the further condition that said Company shall accept and agree to comply with all conditions herein contained, and shall file such acceptance in writing with the town clerk within thirty (30) days from the passage thereof, otherwise this permit shall be null and void.

SECTION 6. In case said Company shall file its acceptance of this permit within thirty (30) days, then, unless the entire equipment authorized hereunder shall be completed before July 1st, '96, all and every authority and permission herein granted shall cease and said Company shall loose all rights hereunder.

SECTION 7. The said Company shall accept this order or location, together with all and singular conditions and agreements, by filing with the clerk of the Selectmen such acceptonce in writing, within (30) days from the receipt of notice granting said order by said Selectmen, as may be acceptable to said Board.

SECTION 8. And it is agreed between the Needham & Newton Street Railway Company and the town of Needham, that no grant or privilege named in this franchise shall have effect unlesss at the time of filing their acceptance, as required above, the Railway Company shall deposit with the Treasure of the town of Needham, a one thousand dollar United States Government Coupon Bond, as a guarantee that the said Company shall have the road built and in operation with cars running on time—table time between Needham and Newton Centre, and propelled by electricity on June 1st, 1896; and if from any cause what-so-ever the Railway Company shall fail to have cars regularly running as above required on June 1st, 1896, they shall forfeit all claim to the bond deposited and the Treasurer of the town of Needham shall proceed at once to sell said Bond at private sale, and the proceeds from such sale, shall be for the use of the inhabitants of said town of Needham, and the Railway Company shall bring no action for its recovery. In case the Railway Company shall have cars regularly running on June 1st, 1896, between Needham and Newton Centre, the bond

shall be returned to said Company.

# Sixth Annual Report

OF THE

# WATER COMMISSIONERS.

*To the Inhabitants of the Town of Needham:*

The water commissioners would respectfully present their report for the year ending Dec. 31st, 1895:

At the annual town meeting Mr. George A. Adams was re-elected for three years. The board organized by choosing James Mackintosh as chairman and George A. Adams secretary.

## EXTENSIONS.

We have made the following extensions during the year: Grove street 155.2 feet of 4 in. pipe, Grove ave. 953.4 feet of 8 in. pipe and 890.9 feet 6 in. pipe, Station street 763.2 feet 6 in., Carter Place 34.1 feet 6 in. 292.3 feet 4 in. pipe making in all 3089.1 feet, added to that previously reported makes 119,575.1 feet or 22.64 miles. We have caused to be set 3 hydrants and 5 gates and boxes making in all on our system 181 hydrants and 175 gates.

The extensions at River Park were made after the owner had given a bond with two sureties to pay six per cent on the outlay less the amount received from water rates, until such time as the income of such extensions will be sufficient remuneration for the town.

PIPE.

The lowest bid for furnishing the pipe was from R. D. Wood & Co., Philadelphia Pa., May 24th, 1895 at $21.80 per ton of 2240 lbs. and $2.25 per cwt. for specials. F. O. B. on cars at Needham.

PIPE LAYING.

The contract for pipe laying was awarded to Joseph Bruno of Boston at the following prices: For 4 in. pipe 20 cts. per running ft., for 6 in. pipe 22 cts., for 8 in. pipe 24 cts.

SERVICE PIPES.

The contract for putting in service pipes was continued another year with J. F. Buckley & Co. of this town at the same price as heretofore.

BONDS.

Bonds have been issued during the year to the amount of $10000 in conformity with a vote of the town April 7th, 1894. The same were sold Aug. 13th, 1895 to Messrs. Brewster, Cobb & Estabrook at a premium of $584.00. The accrued interest at that time was $182.22 making for bonds premium and accrued interest $10766.22.

BONDED DEBT.

$2000 of the matured bonds have been paid during the year.

The outstanding water debt matures as follows:

| | |
|---|---|
| $2000 each year from 1896 to 1900 inclusive, | $10000 00 |
| For 1901, | 5000 00 |
| For 1902 to 1917 inclusive $5500 each year, | 88000 00 |
| For 1918 to 1920 6000 " " | 18000 00 |
| For 1921, | 5500 00 |
| For 1922, | 5500 00 |
| For 1923, | 6000 00 |
| The total amount of outstanding bonds, | $138000 00 |

The total amount of bonds that have matured and been paid to date is $7000.

The water board would recommend a more general use of meters. There will soon be a necessity for an increase of our water supply or a diminution of waste of water. We are using and wasting 53 gallons of water per head a day and the waste increases as time rolls on.

ESTIMATES FOR 1896.

The board have estimated what in their judgment will be needed to meet the expenses in 1896.

| | | |
|---|---|---|
| Interest, | 5520 00 | |
| Salaries, | 1520 00 | |
| Coal and wood, | 750 00 | |
| Miscellaneous, | 612 00 | |

JAMES MACKINTOSH,
GEORGE A. ADAMS,
JOHN M. HODGE,

Water Commissioners.

# Superintendent's Report.

*To the Honorable Board of Water Commissioners:*

GENTLEMEN:—I have the honor to present herewith the annual report of this department for the year ending December 31st, 1895. The works generally are in good condition. The hydrants and gates are in good working order. The interior surface of the standpipe is in good condition but the exterior is somewhat weather beaten and provision will be made to have it painted the coming season.

The pumping station is in good repair. The pumps have been thoroughly repaired and when it was necessary new valves, springs and discs were put in so they are now in good condition. The boilers have been inspected and were found to be in good order.

The furnaces have been relined, and as the old cheeks and arches were considerably burned new ones have been added.

The water mains has been extended as follows: 322.4 feet of 4 inch pipe in Carter Place, 953.4 feet of 8 inch and 883.7 feet of 6 inch in Grove avenue, 155.2 feet of 4 inch in Grove street and 755.6 feet of 6 inch in Station street. With Hydrant connections makes total of 3089.1 feet for the year. 3 hydrants have been set making a total of 181. 5 gates have been added making a total of 175. For detail statement see following tables:

The increase of consumption of water over last year is ten million gallons or 25 per cent, while the increase of consumers is only 7 per cent. and the increase of revenue 11 per cent.

The increase in number of meters over last year is 15 per cent, while the increase of metered water is only 10 per cent. and increase of revenue from metered water 19 per cent.

There is no doubt that 25 per cent of the consumption of water is due to leakage or waste. One thing is certain that over fifty million gallons of water was pumped in the stand pipe and nine million gallons or 18 per cent that was metered earned 60 per cent of the total revenue. This should be an object lesson and an

argument in favor of metering every service. If this ratio of increase in pumping continues it will not be many years before it will be necessary to increase our supply, which will mean the expenditure of several thousand dollars and I reccommend as a matter of business, to save this expenditure, and as a matter of equity with the water consumers, the advisabilily of establishing strictly a meter system.

I would also recommend putting a horse trough at the junction of South and Chestnnt streets, one at Highland avenue near Newton line and one at the junction of Central avenue and Reservoir street, as these are the long dead lines of pipe, a stream running continually would improved the condition of the water and would certainly be a great convenience to the public.

Respectfully submitted,

GEORGE A. ADAMS,
Superintendent.

# REPORT

OF

# Superintendent of Streets.

To the Board of Selectmen:

Gentlemen:—I submit the following report:

The first of November I took charge of the streets. First work accomplished was scraping between eight and nine miles of gutters on the following streets: Hunnewell, West, Nehoiden, Maple, Chestnut and Chapel streets; Central, Great Plain, Hillside, Dedham and Highland avenues, and used the material scraped from the gutters in widening the streets whereever needed, and laying foundations for sidewalks in low places, and the remainder was given to parties near by, as it would cost more to haul it a great distance than it was worth to the town.

I think if more attention was paid to cleaning the sides of the streets and have the gutters in proper shape, it would not take near so much gravel to crown up the road.

Graveled Hillside avenue from West to Rosemary streets, spreading 196 loads, at a cost of $120.00. Spreading 32 loads gravel on West street, $17.00. Spreading 58 loads gravel on Central avenue and Fisher street, costing $32.00. Made about nine hundred feet of sidewalk on Maple, Oak, Linden, Grant and Hunnewell streets.

Put in two dry wells on Warren street.

New planked Day's bridge.

Repaired and built quite a line of railing on different streets, using the men employed on the repairs to do the work.

# Report of the Trustees.

It is very gratifying to the trustees to note the increasing interest manifested in the Public Library. The number of volums taken out this year exceeds that of any previous year.

The teachers and pupils of the public schools are making a greater use of the library than ever before. There is also a great improvement in the quality of the books called for by the young people, and through the untiring efforts of the librarian the standard of books read has been very much raised. Less fiction and more history and science improves the minds of the young and makes them more substantial and better fitted to bear the burdens of life. The Public Library is a great educator. Few are aware of its influence in the formation of the habits and character of the rising generation. Other circumstances being the same, that town which has the best selected and best read library is the most intelligent and progressive. It is hoped that the town will be liberal in its appropriation for the Public Library. Here the children of the poor man are benefitted equally with those of the rich. If expenses must be reduced better cut down the appropriations in other departments than in the line of education. It is hoped that the voters will not lose sight of the fact that we need a larger and better reading room and a more safe location for the books.

As the town has many very valuable records which should they be destroyed, can never be replaced, and as their present location is a very unsafe one, the dangers from fire being great, it has been thought by the selectmen and library trustees who

have held conferences on the subject, that a good plan for the town would be to erect a library building with fire proof apartments for the valuable town records and conveniences for the town officers. When the town has increased in numbers and wealth so that it is advisable to build a town hall this building could be devoted entirely to library purposes.

Chairman.

The committee recommend that all unexpended balance, except the unexpended balance of Water Department be turned into the treasury and the deficiencies be paid from the treasury and their estimates for appropriations have been made accordingly.

To facilitate the business, the committee instructed its Secretary to prepare motions in accordance with the foregoing recommendations and present them at the annual meeting.

Respectfully submitted,

GEORGE A. ADAMS,
Secretary.

# Annual Report

OF THE

# Chief of Fire Department

To the Board of Selectmen:

Gentlemen:—I herewith submit to you my second annual report for the year ending Dec. 31, 1895.

## FIRES.

A total of 19 calls including two second alarms as follows, Bell alarms, 11, Still alarms 2, Verbal calls, 6. Seven of these calls were for buildings, twelve for wood and grass fires, in addition to the above there were two fires extinguished by citizens and one by firemen in buildings without any alarm. Making a total of 22 fires, 4 buildings were slightly damaged, and 3 totally destroyed.

## VALUE OF BUILDINGS AND CONTENTS WHERE FIRE OCCURRED.

| | |
|---|---|
| Value of buildings, | $3,650 00 |
| Value of contents, | 2,114 85 |

## LOSS ON BUILDINGS AND CONTENTS.

| | |
|---|---|
| On buildings, | 580 00 |

| | |
|---|---|
| On contents, | 950 00 |
| Total loss for the year, | $1,530 00 |

INSURANCE ON BUILDINGS AND CONTENTS.

| | |
|---|---|
| On buildings, | $1,700 00 |
| On contents, | 690 00 |

In responding to these calls the apparatus and members have render the following service: hose used 3,600 feet, ladders used 150 feet; miles travelled 46; duration of service 392 hours; services rendered by men not belonging to Department, 70 hours making a total of 462 hours.

The above alarms were given as follows: Firemen, 6; Citizens, 12; Police, 2.

The number of men in the Department is 40 including the Superintendent of Fire Alarm.

HOSE.

The Department has 3,300 feet of good hose, 400 feet not reliable, and 500 feet leaky hose. There were 500 feet of new hose purchased this year to replace the 500 feet that leak. This hose is distributed among the several Fire stations. Some of this leaky hose can be used in case of an emergency.

APPARATUS.

The apparatus is in reasonable good repair. The Truck needs painting and a head light placed upon it. The axles on the hose wagons need setting, also touching up and varnishing. These were never set properly when the wagons were built and the result is they run hard, and I would recommend 200 dollars be appropriated for the same, and also to meet the expense of some needed repairs on the Fire stations.

RESIGNATIONS AND APPOINTMENTS.

May 1st, Supt. of Fire Alarm, H. D. Rogers tendered his resignation and Charles A. Searcy was appointed to fill the vacancy.

Nov. 30, Dist. Chief J. H. Beech resigned on account of moving out of town and A. F. Woodward, Capt. of Hose 2, was appointed to fill vacancy.

Nov. 30, Albert Mills was appointed to fill vacancy in Hose Co. 1 caused by death of a member.

Hose Co. 2, there were four resignations and four appointments.

ACCIDENTS.

Aug 24, Capt. A. F. Woodward of Hose 2 while responding to an alarm of fire slipped on a stone and sprained his ankle which laid him up 2 months.

DEATHS.

The death of P. H. Flaherty member of Hose 1, occurred Nov. 3. Death caused by Pneumonia age 32 years.

FIRE ALARM.

The Fire Alarm has been kept in excellent condition throughout the year. There were 3 miles of wire and two signal stations added to system this year making 25 miles wire and 15 signal stations. The new stations are located, one at Charles River and Grove streets and one at Greendale School House.

Station 82 was removed from the old paper mill to the corner of South and Charles River streets making it more convenient for people in that locality.

The number of strikers and gongs in the different circuits are as follows: 3 strikers, 7 gongs, 4 tappers and one electric test clock and 100 jars of battery.

By requests from citizen on West street. Highlandville and Great Plain Ave. near Wellesley line, I would recommend a signal station located in each place, the expense would be comparatively small as the poles are already on those two streets; as it is in case of fire they would have to go a long distance to give the alarm, the expense of the two stations and wiring would be $250 dollars.

My personal acknowledgments are respectfully tendered to the general heads of departments for the courtesies of the year, to the

assistant Engineers I am especially indebted for their hearty and cheerful co-operation in all details necessary to the successful management of this department.

I am pleased also to commend the officers and members of the several companies for their earnest and faithful attention to duty.

Respectfully Submitted,

H. A. KINGSBURY,
Chief of Fire Department.

## INFORMATION TO THE PUBLIC.

Before ringing in an alarm be sure that a fire actually exists.

Do not give an alarm for a fire seen at a distance, as all needless alarms are an expense to the town and should be avoided.

To give an alarm pull down the hook in the box once, without jerking, and let go. Wait at box and direct the firemen to the fire.

For a brush fire strike ten blows with the key and then pull down the hook, but never pull in alarm first for a brush fire.

After unlocking the box do not attempt to take out the key, for no one but an engineer can release it, as all the boxes have trap locks,

After the first alarm has been rung in, all other alarms or signals are given only by the engineers.

Never give a second alarm for the same fire without an order from the Chief Engineer or Assistants.

Citizens are earnestly requested to keep themselves informed as to the location of keys. Signs over the boxes will give the desired information.

## CAUTION TO PERSONS HOLDING SIGNAL KEYS.

Never open or touch the boxes except in case of fire. Be sure your station is locked before leaving it. Never let the key go out of your possession, except to some responsible person, to give an alarm of fire, and be sure the key is returned. If you remove from your house or place of business, return the key to Chief of Fire Department.

# TOWN OF NEEDHAM.

## REPORT

OF THE

# SCHOOL COMMITTEE

FOR THE YEAR 1895.

We submit herewith for the consideration of our fellow townsmen the third annual report of Mr. Frank E. Parlin Superintendent of the public schools. The committee feel well satisfied with the work which Mr. Parlin has accomplished since he assumed the management of the schools and we recommend that the suggestions contained in his report be adopted by the town. We call especial attention to that part of his report relating to the present insufficient accommodations for the Kimball schools. We are fully convinced that the time has now come when some action must be taken to releave their crowded condition and we earnestly recommend that in accordance with his report a building be erected in some suitable location as soon as possible for the high school. Unless this is done or some other adequate relief is at once provided we shall be unable to furnish the children of our town with those opportunities for instruction which the law requires.

In conformity with a rule adopted some years since we herewith present the names of those who graduated from the high school in June last and were awarded diplomas for having creditably "completed the course of studies prescribed for the Needham High School and sustained an honorable rank for scholarship and deportment." They are Lucy Avery Carter, Florence Theresa Hutchinson, Frederick Mortimere de Lesdernier, Edith Mabel Lord, Charlotte Helen Lovell, Linnie Maria Newell, Joseph Stanton, Clarissa May Sutton, Carrie Louise Whipple, Austina May Whitemore.

The school appropriations for the year 1895 including the income from the state fund amount to $13,895.08 of which, the sum of $13,798.84 has been expended. We recommend for the coming year that $12,000.00 be appropriated for schools, including the salary of the superintendent, $900.00 for incidentals, and $800.00 for books and supplies. It may be thought advisable by the town to paint one or more of the school buildings the coming summer in which event an additional appropriation should be made for that purpose.

Respectfully submitted for the committee.

EMERY GROVER,
Chairman.

# Annual Report

OF THE

# SUPERINTENDENT OF THE PUBLIC SCHOOLS

OF NEEDHAM.

*To the School Committee:*

I herewith submit my third annual report of the public schools of Needham which also embodies the reports of the supervisors of music and drawing and of the principal of the high school.

## STATISTICS.

The school census of 1895 gives 244 as the number of children in town between five and eight years of age and 353 as the number between eight and fifteen—or 597 between five and fifteen years of age. Of this number 293 were boys and 304 were girls.

A comparison of the statistics of the last two years shows an increase of 24 in the number of children in town between five and fifteen years of age, an increase of 74 in the number of pupils enrolled, an increase of 30.45 in the average membership, an increase of almost one percent in attendance, an increase of

41 in the membership at the close of the year and of 225 in the number of visitors.

The total enrolment of pupils this years is 721. The Avery and Kimball schools, exclusive of the high school which enrolled 6 more, have each enrolled 33 pupils more than last year. The Eliot enrolled 13 more while the Dwight enrolled 13 less. The numbers at the Parker and Harris remain about the same, the former having gained 3 while the latter lost 4.

The gain and loss by grades is as follows,—first grade gained 15, second lost 1, third remained the same, fourth gained 9, fifth gained 9, sixth gained 5, seventh lost 13, eighth gained 35, ninth gained 8, high school first year gained 11, second year gained 2, third year lost 4, while the number in the fourth year and the number of graduates are the same as a year ago.

Notwithstanding the impression in the minds of a few that the children are being pushed forward through the grades too rapidly, the average age of the pupils in the several grades is somewhat above that of last year.

Several facts are clearly indicated by the results of this comparison. First, that we began the year with an increase of over four percent in number of children between five and fifteen years of age; second, that there has been a considerable accession from families having moved into town during the year; next, that there is a tendency to move from the outside districts into the villages; and, finally, that the pupils in the upper grades are not leaving school as early as formerly.

## SCHOOL GOVERNMENT.

Perhaps, I may quite properly state at this time to you, as I have already stated to the teachers, what seems to me should be the spirit and character of the school government.

The spirit of a good and wise home-government is the proper standard.

The good of the pupil, not the wish or convenience of the teacher, should always determine the method.

The chief ends are to train the pupil to govern himself and to act habitually from right motives.

The only forces that can control the pupil in self-government are within himself, not in the arm of the teacher. It is the function and duty of the teacher to give these forces appropriate exercise by supplying proper motives.

While it is sometimes necessary for the will of the teacher to supplement the will of a pupil, it should very rarely indeed substitute it.

A good disciplinarian keeps force well behind the throne—out of sight—preferring to be recognized as *friend* rather than as *master*.

It should always be presumed that a pupil has a reason for his conduct. The teacher should seek for causes. Judgment without a hearing is injustice.

The pupil's character is involved in the school government, therefore the teacher should never hurry a case of discipline but take time to study it, in order to treat it for the permanent good of the child. In chronic or difficult cases, the teacher does well to confer politely but frankly with the the parents and solicit their hearty cooperation.

A dull pupil, when he has done his best, is just as worthy as the brightest when he has done his best. To censure a pupil for lack of effort may be justifiable, but to abuse him for natural inability is contemptible.

Scolding is a nuisance anywhere, especially in the school-room for it demoralize both teacher and pupil. In governing, the eye is better than the tongue.

Habitual keeping pupils after school is a sure sign of a weak teacher.

Teachers should be able to take a genuine interest in their pupils outside of their studies. No heartless and senseless "gush" but a good, frank, honest sympathy.

There are two kinds of school government that pupils and parents most heartily and justly condemn. One is the tyranny and caprice of a narrow, selfish or peevish mind; the other is the laxity and confusion due to the presence of a lazy, careless or forceless teacher.

Good common sense and a great, warm, generous heart are the prime requisites of a good disciplinarian. The time was when little more than brute force was considered necessary in

the government of a school. If the teacher had the strength to overpower his pupils physically and the willingness to use that strength, the conditions for good order were thought sufficient. It does not require a very high order of ability to take a child by the shoulder and force him into a correct position or whip him if he doesn't promptly do one's bidding, but it takes an artist to so operate upon the *mind* of a refractory pupil as to lead him to assume the position voluntarily and do the right thing from choice. There is something wrong with that teacher who finds it necessary to resort often to corporal punishment. While it would be unwise to forbid corporal punishment in the schools, it is equally unwise to resort to it, except in extreme cases. It is very rarely used or recommended by good disciplinarians. There are higher and better motives than fear by which children can be governed. The pupil should find in his teacher a worthy example, something to attract and inspire the best there is in him, something broader, wiser and nobler than he finds in himself, something to respect and trust and attain to..

Often teachers give so much attention directly to the *badness* of a bad pupil that they fail to appreciate his good qualtties. By continually reminding him of his wrong doing and treating him as though they expected nothing better, he either loses hope of being able to redeem himself in their eyes and to win back their confidence or, through boyish conceit, feels flattered by so much attention and by being called a "hard boy," considering himself somewhat of a hero among the less notorious. Now the best way to kill weeds is to cultivate something else.

The teacher legally stands *in loco parentis* and needs to consider seriously how responsible the office and how sacred the interests intrusted. Whoever does not appreciate the responsibility or the importance of a right spirit in the school is hardly prepared to instruct and govern children, for, after all, it is the *spirit* and *character* of the *teacher* that most vitally affect the pupil. I always pity the pupils of those teachers who put no heart or soul into their work but make teaching a trade—so much time for so many dollars. How nice and free and comfortable it seems to go into a school where the unfortunate forget their misfortune, the slow their dulness and the bad their

perversity; where the needs of each are wisely met and all rival all in doing their best, because all are counted worthy of the teacher's love and to be equal sharers of her sympathy.

It takes a noble soul to influence nobly another soul. It is less important *what* the child studies than with *whom* he studies. The ultimate end of the school is not so much knowledge as conduct. We are not satisfied with scholarship alone, we want character also. The government of the school should tend to make the pupil master of himself, should foster in him a deep, strong, manly regard for truth, purity and justice, and should promote reverence, philanthrophy and pure patriotism.

## TEACHERS.

It is only right that a word be said in appreciation and commendation of the teachers. Since my acquaintance with your schools you have not had a more able and worthy corps. Generally, I have been much pleased with their spirit and aims. Some have improved greatly. Some have taught under very unfavorable conditions but have rarely lost courage or patience.

We have been unfortunate in losing from the schools several excellent teachers, but have been equally fortunate in the choice of those who now occupy their places.

Early in November, Miss Martha A. Alexander, who has such a long and honorable career in the Kimball Primary school, asked and received leave of absence for the remainder of the year.

For some time, the number of pupils attending the Dwight school has been gradually diminishing. As there was no prospect of any immediate increase, it seemed unnecessary to continue the services of two teachers in the primary department. Since the opening of the fall term Miss Sutton has been alone in this department, and, as the average attendance for the year is only 33.1, she has not been overburdened with numbers.

## MUSIC.

In several respects the work of the supervisors of music had not been satisfactory and it seemed advisable to make a change in June.

Mr. F. W. Archibald of Waltham, who was chosen to take charge of the music, came to us with a most excellent reputation both as a man and as an instructor. The term of his service has been too short to secure many definite results, but the character of his work seems right and in every respect satisfactory. Such changes as he has suggested seem dictated by sound judgment and the greater good of the schools.

He has met some difficulties of long standing but they are gradually disappearing and doubtless will finally be overcome.

I herewith submit the report of the supervisor of music.

*Frank E. Parlin, Superintendent of Schools.*

Dear Sir,—

In a report covering one short term one is hardly able to point to any definite results. There is, however, an improvement in the spirit of the pupils; also in the quality of their voices.

I feel encouraged in the work as done in most of the schools, especially so in the primary and intermediate grades. The "New and Improved Normal Chart," which your committee have kindly placed in the primary schools is a great improvement over the old "Normal Chart," as the exercises are better graded and it gives practice in reading in all the keys whereas the old chart embraced but eight keys. It also introduces Mr. H. E. Hoet's new system of intervals called vocal harmony, which I believe is based on true psychological principles, and which in time should be applied to all reading of vocal music. This drill in intervals which has been started in all the schools is invaluable, as it gives the pupils a clear and definite idea of the relationship of tones, thereby increasing the confidence in reading music, besides being an excellent means of voice culture. I intend to apply this system of reading music in all the schools as fast as practicable.

In the sub-grammar and grammar grades the scholars show a lack of power to read new music in two and three parts. As this can only be attained through a great deal of practice, which should be well started in the lower grades, I cannot hope for any immediate results. However by having plenty of music to read the pupils will gain confidence and readiness in this direction.

There is considerable good talent in the High school which should be encouraged and brought out. They have begun to study a short cantata "The Wreck of the Hesperus" by Anderton, which I hope the school may prepare, and give as a public entertainment. The general spirit of the pupils is good and I have no doubt but that they will give a creditable performance. A girls glee club which is being organized will help to increase the interest in this branch of the work. They are to have a special lesson once every two weeks.

Respectfully submitted,

FRED W. ARCHIBALD,
Supervisor of music.

DRAWING.

Agreeably to my recomendation a year ago, you decided to employ a supervisor of drawing one day each week. Miss Mattie B. Bent was elected to the position and began her work in April. She was at the same time supervisor of drawing in the Natick schools where she had proved her ability by the unusual efficiency of her services. During the term she was married, becoming Mrs. Cutting, and in June resigned.

Miss Alice M. Prince of West Roxbury was chosen to fill the vacancy. Although her experience was quite limited, her training had been excellent.

Thus far the work in the grammar and high schools has necessarily been quite elementary because the pupils had little or no previous instruction in the subject.

We hope to so modify the work in the lower grades and develop it in the higher as to make it one of the most practical and profitable subjects of the course.

I herewith submit the supervisor's report.

*F. E. Partin, Superintendent of Schools.*

DEAR SIR :—

I would say in regard to the drawing, in the Needham schools, I feel that the work is progressing as rapidly as can be expected at this early stage. The work thus far especially in the higher grades has been chiefly elementary, as the subject is comparative-

ly new, what drawing having been accomplished thus far being principally mechanical. It is my plan during the next term to take up the subjects of color and free hand drawing, leaving the subjects of botanical drawing and design until the spring months.

In the high school I feel that another year it would be advisable to make two divisions of the school which is very large at present, and having had the subject during one year it will be necessary for the older pupils to have work of a different nature from those just entering.

As the work progresses more material will be needed to carry it on intelligently, as there was very little drawing material in the schools, with the exception of the lowest grades, when they have been provided with the necessary models, etc., the expenses for the succeeding years in the way of material will be slight.

I wish to thank the teachers, for their earnest efforts to aid me in making the work a success, and I would say also that I am pleased with the spirit shown by the pupils and with the interest which they manifest in the subject.

Respectfully submitted,

ALICE M. PRINCE,

Supervisor of Drawing.

## FLAG DAYS.

Our list of flag days has been superseded by the law enacted at the last session of the General Court, requiring the National flag to be displayed outside the school buildings on fair days and inside the buildings on stormy days, while the schools are in session.

We have intended to comply fully with this statute, but, in one or two cases, accidents have prevented our doing so for a time.

Through the efforts of the children and the cooperation of their parents and friends, assisted by the School Committee suitable staves have been placed upon the Dwight and Parker buildings for which excellent large flags have been provided through the kindness of two generous citizens—Mr. George K. Clarke presenting the one to the Dwight school and Mr. William Carter presenting the one to the Parker. Mr. Carter also presented a new flag to the Avery school.

*The Avery School.*—During the summer vacation a new room on the third floor of this building was furnished to give relief to the lower rooms which had been over crowded for some time. Last year sixty pupils were enrolled in the two grades in each of the two lower rooms. The teachers of these rooms, although efficient and faithful, could not do satisfactory work on account of the extremely large number of pupils under their charge. The character of the work in the upper room was marred by the presence of too many grades—the seventh eighth and ninth.

By the new arrangement, there are two grades in each room, except the first where there is but one. Two of the rooms are still over crowded but gradually the numbers will be more evenly distributed through promotions.

The fact that the enrolment sheets of this building contains thirty-three more names than last year seems to indicate a rapid growth in the school, but, as there is still an unoccupied room, the building is adequate to all probable demands for some years to come.

Soon after the opening of the fall term, the teachers of the Second Primary and Intermediate schools exchanged places. The change, although recommended by the superintendent, was entirely optional with the teachers. Each is better adapted to her present position and everything seems to indicate the wisdom of the change.

*The Kimball School.*—The most pressing educational need of the town is at this building. There has been a rapid increase from year to year in the number of children attending this school. Two years ago the Primary room was so over crowded that we took out one whole grade and put it into the Intermediate room, transferring the assistant teacher at the same time. And yet, last year, there were sixty pupils enrolled in that room and, this year, sixty-seven. The present membership is a third greater than should ever be placed in one room and under the instruction of a single teacher. The Newton School Board have a regulation forbidding the assignment of over forty pupils to a teacher. Last spring we were unable to admit a new class to

this room and this spring it will again be impossible to do so. Next September it will be necessary to transfer the second grade to some other room.

When we examine into the condition of the next room, we find it even worse than the first. A year ago the enrolment was sixty-three, last year it was seventy-one. To be sure there is an assistant, but there are three grades, and it is little short of criminal to compel the assistant to teach classes of twenty-five or more children in the room assigned her. It was designed for a clothing room and is almost wholly unfit for recitation purposes. It is very small, receives light through only three-fourths of a single window, is without sufficient ventilation, unless the pupils are exposed to direct draughts and is so difficult to heat, that, on very cold days, it cannot be used.

Something must be done before September to relieve this room as it will probably receive by promotions in June over twenty pupils while it will send out only twelve, provided, every number of the fifth class is promoted. The enrolment in these three grades next year will not be less than eighty names. I see no way except to remove a grade from this room also.

The grammar and sub-grammar rooms, while not over crowded, have all that should be assigned to them. Neither room can accommodate another grade.

At present we are trying to take care of more children in these four rooms of the Kimball building than we have in the five rooms at the Avery. In fact, the conditions at the Kimball, although worse in degree, are the same in character as existed a year ago at the Avery.

*The High School.*—The high school is unusually large and promises to increase its membership next year. It is now very nearly as large as the Wellesley High School. At present, several pupils are compelled to sit in the recitation room, which is also used as a laboratory, there not being seats to accommodate all in the main room.

A second assistant will doubtless be required next year but we have no room to give her. If the recitation room be divided by a partition into two, the laboratories must be removed, but the laboratories are indispensable.

In order for the high school to do as good work as it ought to do and is capable of doing, it needs the following rooms,—a study or assembly room large enough to accommodate the whole school, two recitation rooms, a chemical laboratory, a physical laboratory and a manual training room where the pupils could receive instruction and practice in the use of tools and could make much of the apparatus needed in laboratory work.

Our high school should especially emphasize its work in mathematics, history, English and science since a very large percentage of the pupils do not continue their studies beyond the high school. The pupils should be encouraged to pursue their course as far as they can and it should be possible for them to fit in our high school for any college; but most of its time and energy should be given to the much larger number who cannot go to college.

Needham cannot afford to keep its high school working under the present unfavorable conditions nor can it afford to give its pupils anything less than the best kind of training.

After carefully considering the pressing needs of the schools in this building, it seems to me the only wise way by which all may be relieved is to build a new building on grounds by itself, modern in its appointments and in every way adapted to the needs of a first class high school.

The Kimball building should be devoted to the grades below the high school and changes should be made similar to those made at the Avery—the first grade occupying the first room, the second and the third grades the second room, the fourth and fifth the next, the sixth and seventh the next and the eight and ninth the room now occupied by the high school. Under this arrangement, the number of pupils in the several rooms, beginning with the lowest, would be next year approximately, forty, fifty, fifty, forty and forty. A year or two later it will probably be necessary to open another room, the second grade being so large as to require a room by itself.

A large part of the disciplinary friction in the Kimball building arises from the pupils of the lower grades disturbing the high school at recesses and on entering and leaving the building, the hours of the high school session not coinciding with those of the lower grades.

Did the high school occupy a building by itself, it would assume in the minds of pupils and citizens an individuality and dignity of standing which it can never secure under the present conditions. This would lead the pupils of the grammar schools to look forward to a high school course with greater interest and ambition, pupils of neighboring town would seek admission in greater numbers and parents would prize its advantages more highly than at present. I wish to urge you, and through you, the citizens of Needham to decide this question wisely, upon its merits and for the best good of the children.

The indications are that the town will grow rapidly in the immediate future and no single factor will influence more favorably or unfavorably that growth than the condition of your schools. Nothing is more attractive to home-seekers than a well developed school system. The question should not be, *What will do?* but what in the light of a rational policy, true economy and the general interest, *ought to be done?* What will *time* approve?

I herewith submit the report of the Principal of the Needham High School.

## REPORT

OF THE

## PRINCIPAL OF THE HIGH SCHOOL.

---

*To F. E. Parlin, Superintendent of Schools:—*

I have the honor to submit to you my third annual report of the Needham High School.

Since making my last report we have had opportunity to test the new course of study and it has given much satisfaction to both teachers and scholars. With this course and an additional teacher, I think we could do as good work as is done in even larger schools; but unfortunately we have no room which could be used by another instructor. The rooms which the High

School now occupies were adequate in the early days of the school when it was smaller than at present and when no laboratory facilities were required. As it is now, howevér, our recitation room has to do triple duty, being at the same time a place for pupils to sit in, a recitation room and a laboratory. It is evidently not fit for the latter purpose, not having been contrived for it, and besides, those scholars who are obliged to sit there on account of the main room being full are repeatedly driven from their seats by those who must have them during recitations. There is certainly a painful need of better accommodations and more convenient quarters. We have a good class of pupils and those who come to us from other towns are among our best. Last fall four new ones from Dover entered the High School making six from out of town. Two of these, however, have since moved here to avail themselves of the advantages of our schools. Surely tnis speaks well for our schools, and should lead us to endeavor to improve them further, that others may be disposed to come to us. For each of these pupils the town receives as tuition $40 a year.

Last spring the attendance was not so good as could be desired, but since the opening of the fall term it has been much better. Although the last entering class was much larger than usual—numbering twenty-nine—making the whole number much larger than before, there have been during the past term of fifteen weeks 22 who have not been absent a single session, and 8 who have been absent but once.

A class of ten was graduated in June, and the commendations of the large audience seemed to indicate that the exercises were fully up to the high standard of previous years. One of this class entered Harvard last September, having passed in a very creditable manner the entrance examinations. Another is taking a year at Lassell preparatory to entering Wellesley.

The most noticeable improvement made during the year has been the substitution of the quantitative for the qualitative method of teaching physics. Those pupils who intend entering college can now not only enter in Physics without difficulty, but *all* are benefited by having to do the work and thinking *themselves*, and by the practical knowledge which this course gives. We now have a fairly well equipped laboratory for both Physics

and Chemistry, and, if the school continues to improve in this direction as rapidly as it has in the past, we may do work which shall compare favorably with that done in some of our largest and best schools. I should like to say in passing that it would be hard to find boys more interested than those of our High School in the making of apparatus and in the use of tools. A set of tools has already been purchased, and a place should be provided that the pupils may be enabled more fully to avail themselves of this important adjunct of ordinary school work.

While we have thus been adding to our scientific department, other departments have not suffered; the study of English has received careful attention, and our reference library has been increased by the addition of some twenty volumes.

Nearly all the N. E. colleges admitting on certificate now receive graduates from the classical department of our school without examination. The publication of an excellent school journal by the students and the general high character of the work maintained, show that all are availing themselves of that training so essential to success in life.

Respectfully,

C. L. Judkins,
Principal High School.

Now, Madam and Gentlemen, I wish to thank you individually and as a committee for your constant and unanimous support and cooperation.

The success of my labors in you schools is in no small measure dependent upon your good judgment and unfailing loyalty to the educational interests of the town.

Respectfully submitted,

Frank E. Parlin,
Superintendent.

## WARRANT.

*COMMONWEALTH OF MASSACHUSETTS.*

NORFOLK, ss.

To WILLIAM WRAGG, a Constable of the Town of Needham, in said County, GREETING:

In the name of the Commonwealth aforesaid you are hereby required to notify and warn the inhabitants of the town of Needham, qualified to vote in elections and in town affairs, to meet at the Town Hall, on Monday, the second day of March next at one o'clock in the afternoon, then and there to act upon the following articles, viz:

ARTICLE 1. To choose a moderator to preside in said meeting.

ARTICLE 2. To hear and act on the reports of town officers and committees.

ARTICLE 3. To elect the following officers for their respective terms of office: town clerk, three selectmen for one year, two overseers of the poor for one year, three assessors for one year, town treasurer, collector of taxes, two auditors, two constables, one member of school committee for three years, one water commissioner for three years, two trustees of the public library for three years, and all other necessary town officers, and to vote "yes" or

" no " in answer to the question : " Shall license be granted for the sale of intoxicating liquors in this town? "

ARTICLE 4. To see what action the town will take in regard to deficiencies and unexpended balances.

ARTICLE 5. To see what disposition the town will make of the money received from dog licenses.

ARTICLE 6. To see if the town will accept the list of jurors as prepared by the selectmen and published in the town report.

ARTICLE 7. To see what action the town will take in regard to borrowing money in anticipation of the collection of taxes.

ARTICLE 8. To see what action the town will take in regard to borrowing money in anticipation of issuing its water loan bonds.

ARTICLE 9. To see what action the town will take in regard to the income from the water department.

ARTICLE 10. To see what action the town will take in regard to the application of meters to every water service.

ARTICLE 11. To see if the town will accept the provisions of Chapter 455 of the Acts of 1894 relative to plumbing.

ARTICLE 12. Upon the petition of William Carter and others, " to see if the town will vote to instruct the selectmen to lay out Pine Grove street as per plan drawn by Emery Grover."

ARTICLE 13. Upon the petition of George C. McIntosh and others, " to see if the town will vote to repair the damage the property of George C. McIntosh has suffered by reason of the removal of the retaining bank where Great Plain avenue was widened."

ARTICLE 14. To see what action the town will take in relation to the purchase of land for park purposes.

ARTICLE 15. To see what action the town will take toward the erection of a building for library and town office purposes.

ARTICLE 16. Upon petition of J. H. Grant and others, "to see if the town will rescind the vote passed at the annual meeting in the year 1895 under Article 14 of the Warrant of that year, which vote is as follows: Voted, That no elected town officer shall hold a salaried position under the board of which he is a member."

ARTICLE 17. To see what action the town will take to provide quarters for tramps.

ARTICLE 18. To see how the town will have its taxes collected, and fix the compensation therefor for the current year.

ARTICLE 19. To see if the town will vote to have the reports of its officers and the proceedings of this and other town meetings printed.

ARTICLE 20. To see if the town will vote such sums of money as may be necessary for all or any of the purposes mentioned in the foregoing articles, or as may be required to defray the expenses of the town for the ensuing year, and to act upon the recommendations of the committee on appropriations appointed at the last annual town meeting.

The polls will be opened at one o'clock in the afternoon, and may be closed at five o'clock.

And you are directed to serve this Warrant by posting copies thereof by you attested in not less than twenty public places in said town at least seven days before the time of holding said meeting.

Hereof, fail not, and make due return of this Warrant with your doings thereon unto our town clerk on or before said day and time.

Given under our hands and the seal of the town of Needham aforesaid, this nineteenth day of February A. D. eighteen hundred and ninety-six.

TOWN SEAL

ARTHUR WHITAKER,
FRANCIS L. FULLER,
WILLIAM G. MOSELEY,

Selectmen of Needham.

# OFFICER'S RETURN.

NORFOLK, ss.

NEEDHAM, February 22, 1896.

By virtue of this warrant, I have this day notified and warned the inhabitants of the within named town of Needham, to meet at the town hall as within directed, by posting true copies of this warrant, by me attested, in twenty public places within said town, at least seven days before the time of holding said meeting.

WILLIAM WRAGG,

Constable of Needham.

A true copy.

Attest: CHARLES C. GREENWOOD.

Town Clerk.

# Record of Annual Town Meeting

March 2, 1896.

A meeting of the inhabitants of the town of Needham, qualified to vote in elections and in town affairs, was held pursuant to the foregoing warrant, in the Town Hall, in said town, on Monday, March 2, A. D., 1896.

Article 1. Albert M. Miller and George W. Poggi were appointed tellers by the town clerk to aid him in checking the names of voters and counting the votes for moderator, and they were sworn to the faithful discharge of their duties by the town clerk.

The result of the voting for moderator (the check list being used) was as follows:

| | |
|---|---|
| Charles E. Allen had | 187 votes |
| John W. Titus had | 106 votes |

and Charles E. Allen was declared elected moderator, and was sworn by the town clerk.

Art. 2. Laid upon the table.

Art. 3. Voted to proceed to ballot for a town clerk, three selectmen for one year, two overseers of the poor for one year, three assessors for one year, town treasurer, collector of taxes, two auditors, two constables, one member of school committee for three years, one water commissioner for three years, two trustees of the public library for three years, and to vote "yes" or "no" in answer to

the question: "Shall license be granted for the sale of intoxicating liquors in this town?"

Before the opening of the polls the selectmen appointed William H. Wye and James Ford, Jr., as ballot clerks, and they were sworn into said office by the Moderator before entering upon their duties. The ballots prepared for use at this election by the town clerk were then delivered by him in a sealed package to said ballot clerks, and their receipt taken therefor. Cards of instructions were then posted in each of the voting compartments, and cards of instructions and the specimen ballots were posted in the hall outside of the guard rail, as required by law. The ballot box furnished for use at elections by the secretary of commonwealth was opened publicly by the moderator and shown to be empty, and examined by the moderator and town clerk and found to be empty. The box was then locked and the key to the lower part delivered to George Twigg, the officer in attendance at the election. The polls were opened at thirty-five minutes past two o'clock P. M., and were kept open until five minutes past seven o'clock P. M., when, as the meeting had voted, they were closed. At the opening of the polls the ballot-box register stood at (0).

The selectmen having appointed Charles E. Stanwood, Henry T. Childs, Elwyn R. Thorpe, Frank T. Probert and Charles H. Crowley as tellers, they were sworn to the faithful discharge of their duties by the moderator. Additional tellers were appointed by the moderator, and sworn by him, viz.: Harrie S. Whittemore, David H. Livingston, Charles H. Allen, William C. Freeman and Walter Hewett. James Ford, Jr., and William H. Wye were appointed tellers by the moderator, and they were sworn to the faithful discharge of their duties by the town clerk. At ten minutes past five o'clock the ballot box was opened (the moderator and town clerk deeming it advisable

so to do), and two hundred ballots cast by men voters were removed from the box. At the close of the polls the ballot-box register stood at 646 (owing to some defect in the working of the box it failed to correctly register the number of votes cast). As the ballots were taken from the box they were audibly counted by the moderator, and the whole number was 681. The whole number cast by men voters was 507. The whole number cast by women voters was 174. The two check lists used for the men voters each showed 507 names checked thereon, and the two check lists for women voters each showed 174 names checked thereon.

A canvass of all the votes given in was made as required by law. Upon the completion of the canvass of all the votes cast, the result of the voting was declared by the moderator to be as follows, viz.:

Art. 18. Voted that all poll taxes shall be payable on demand, and all other taxes on or before the first day of

October. Interest at the rate of one-half of one per cent a month shall be charged on all taxes not paid on or before the first day of November. The collector shall use the means provided by law for the collection of all taxes remaining unpaid after the first day of December.

(The above paragraph shall be printed on the tax bills.)

Voted that the collector of taxes shall have the same power which the treasurer would have when acting as collector.

Voted that the collector receive his pay when one-fourth amount of warrant is received, and when one-half the amount received, and when three-fourths of amount received, and the balance of pay when the full amount has been collected.

If in the judgment of the collector, that in consequence of removal, or any other circumstance, any tax should be collected before the first of October, he is fully authorized to serve his warrant in the collection of such tax at any time. The collector shall guarantee the full amount of all taxes legally assessed and committed to him for collection, and shall be held to pay the town treasurer the same, with any interest that may accrue thereon (except such sums as may be abated by the assessors); he shall pay the said taxes and interest from time to time, as he collects the same, and shall pay the full amount of all taxes committed to him, with the accrued interest, on or before the first day of April, 1897. The compensation of the collector shall be one per cent. on all taxes and interest collected by him and paid to the treasurer.

Art. 19. Voted that the auditors cause the valuation list and the financial and other reports of town officers and committees, together with their own report on the same, to be printed and delivered to the selectmen for distribution as soon as possible after the first of January.

Voted that the town clerk cause to be printed official copies of the proceedings of this meeting, one of which he shall send to each officer of the town within two weeks after the final adjournment of this meeting, and shall deliver one copy to any voter or taxpayer in the town who may apply for it, and that the town clerk furnish a copy of the record of each and every town meeting held during the year for printing, so that it may be bound with the annual report of town officers.

JUNE 1, 1896.

---

A meeting of the inhabitants of the town of Needham, qualified to vote in elections and in town affairs, was held pursuant to the foregoing warrant, in the town hall, in said town, on Monday, June 1, 1896.

ARTICLE 1. Albert M. Miller and William G. Courtenay were appointed tellers by the town clerk to aid him in checking the names of voters and counting the votes for moderator, and they were sworn to the faithful discharge of their duties by the town clerk.

The result of the voting for moderator (the check list being used) was as follows:

The whole number of votes given in was 24. Albert E. Miller had 24 and was declared elected.

ARTICLE 2. Voted to proceed to elect one water commissioner to fill vacancy caused by the resignation of George A. Adams.

Voted that all business under the warrant except under Article 2 be postponed until 7.30 o'clock this evening.

Before the opening of the polls the selectmen appointed Robert G. Roper and William G. Courtenay as ballot clerks, and they were sworn into said office by the town clerk before entering upon their duties. The ballots prepared for use at this election by the town clerk were then delivered by him in a sealed package to said ballot clerks and their receipt taken therefor.

Cards of instructions were then posted in each of the voting compartments, and cards of instructions and the specimen ballots were posted in the hall outside of the guard rail as required by law.

The ballot box furnished for use at elections by the secretary of the commonwealth was opened publicly by the moderator and found to be empty. The box was then locked and the key to the lower part delivered to George Twigg, the officer in attendance at the election.

The polls were opened at thirty-one minutes past four o'clock P. M., and were kept open until forty-five minutes past eight o'clock, p. m. when as the meeting had voted, they were closed. At the opening of the polls the ballot box register stood at (0.)

The selectmen having appointed Albert M. Miller and Armand J. Mathey as tellers, they were sworn to the faithful discharge of their duties by the town clerk.

The moderator appointed additional tellers, viz.: Robert G. Roper and William G. Courtenay, and they were sworn to the faithful discharge of their duty by the town clerk.

At the close of the polls the ballots were taken from the box and audibly counted by the moderator, and the whole number was 198. The ballot box registered 179. The number of names on the list of voters which had been checked by the tellers at the ballot box was 198, which agreed with the number checked on the list kept by the ballot clerks at the entrance to the voting place.

A canvass of all the votes given in was made as required by law.

Upon the completion of the canvass of all the votes cast, the result of the voting was declared by the moderator to be as follows, viz:

*For Water Commissioner.*

To fill vacancy for term expiring at annual meeting, 1898,

| | |
|---|---|
| Frederic G. Tuttle had | 143 votes |
| William M. Whitney had | 53 votes |
| Scattering | 2 |

And Frederic G. Tuttle was declared elected.

ARTICLE 3. The following reports were submitted by the committee:

NEEDHAM, MASS., April 27, 1896.

To the inhabitants of the town of Needham, GREETING:

Your committee appointed at the town meeting March 2, 1896, to consider the recommendations of the school committee in regard to a new High School Building, together with the subject matter of Article 15, have attended to their duty and would submit the following report with recommendation:

Upon investigation we are convinced that the needs of the schools require immediate relief, and that inasmuch as the need of relief exists in the lower grades we do not deem it advisable to erect a High School Building. We would offer as our recommendation the following: That the town erect a school building with at least six rooms, for the use of pupils of the primary and intermediate grades now in the Kimball school, at a cost not to exceed $7,000, including the furnishings, and that the town purchase the lot of land at the corner of School and Lincoln streets, belonging to Thomas J. Crossman, at a cost of $750 for the location of the same. In the matter of Article 15 of the warrant, to see what action the town will take toward the erection of a building for library and town office purposes, it is the sense of your committee that it is inexpedient for the town to take any action under this article at this time.

F. DE M. DUNN,
WILLIAM G. MOSELEY,
LEVI LADD,
ALBERT E. MILLER,
JOHN MOSELEY,
ADELINE E. HARRIS,
ALICE M. HICKS,
WALTER H. WATSON,
SAMUEL HUDSON,
GEORGE K. CLARKE.

## MINORITY REPORT.

The undersigned, a minority of the committee to whom was referred the "recommendations of the school committee in regard to a new High School Building, together with the subject matter of Article XV., and to report at a subsequent town meeting," respectfully dissent from the conclusions of the majority of the committee and submit the following:

We cordially and emphatically endorse the recommendations of the superintendent of schools in regard to the necessity and expediency of erecting a High School Building as given in his last report, and unanimously approved by the school committee in their last annual report to the town; and we respectfully submit that the best interests of the town and the highest good of our High School would be best subserved by the erection of a High School Building at the present time, to be located in some central position, apart from the other schools of the town, and we recommend that a committee of five be appointed, with authority to procure by competition or otherwise plans for a High School Building, to be submitted to the town for selection and approval, said committee shall also report to the town upon a suitable location or site for said building.

John W. Titus,
William Carter,
J. G. A. Carter,
Francis L. Fuller,
Aaron Twigg.

Voted that the report of the minority be substituted for the report of the majority.

Voted that signers of the minority report, together with the school committee, act as a committee to carry the subject matter of the minority report into effect.

After the result of the voting had been declared by the moderator, the ballots cast, the undistributed ballots and also the check lists, were sealed and endorsed by the election officers, and placed in the custody of the town clerk.

Voted to adjourn to meet in three weeks from this evening at half past seven o'clock.

Attest: CHARLES C. GREENWOOD,
Town Clerk.

# Record of Adjourned Town Meeting.

JUNE 22, 1896.

Pursuant to adjournment the inhabitants of the town of Needham, qualified to vote in elections and in town affairs met in the town hall on Monday evening, June 22, 1896, Dr. Albert E. Miller, moderator, in the chair.

ARTICLE 3. The committee appointed at the town meeting held June 1, 1896, presented the following report:

The committee to whom was referred the matter of procuring plans for a High School Building submit the following:

Your committee organized soon after appointment, and amongst other things done, voted to issue invitations to three experienced architects to make plans for a High School Building for the town of Needham, in competition.

The plans were received on the 20th inst., when your committee held a meeting and selected the plans herewith presented, which your committee recommend shall be adopted by the town as representing a suitable and proper building for the High School of Needham. We also report that there are three lots of land on Highland avenue, north of Great Plain avenue, either of which would be suitable for the site or location of the proposed High School Building, and we recommend that one of said lots be acquired for said building, as the town may decide. Said lots are situated and described as follows, viz:

1st. The lot of land on the easterly side of Highland avenue and on the southerly side of Oakland avenue, 200 feet on Highland avenue, 217 or more feet back, bordering on said Oakland avenue, and containing about an acre, more or less.

2d. Lot of land on the easterly side of Highland avenue, next northerly from and adjoining St. Joseph's church lot, 200 feet on Highland avenue, more or less, to a proposed street fifty feet wide, at nearly right angles with Highland avenue, and measuring 217 feet, more or less, on said proposed street, containing about an acre, more or less.

3d. The lot of land on the easterly side of Highland avenue, corner of May street, and opposite St. Joseph's church lot, being 190 feet on Highland avenue, and 217 feet, more or less, on May street, and containing it is believed, 41,230 square feet of land. Your committee are unanimous in the selection of the plans presented and recommended, and the sites recommended for the High School Building, should the town vote to build.

JOHN W. TITUS, Chairman,
for and on behalf of the
committee.

Voted that the report of the committee be accepted and the recommendations contained in it adopted.

Voted that the sum of $30,000 be appropriated to pay for the construction of a new High School Building, in accordance with the plans secured by the committee appointed at the first session of this town meeting.

Voted that the town treasurer be authorized to borrow, when so directed by the selectmen, the thirty thousand dollars (30,000) appropriated at this meeting to pay for the construction of the new High School Building, giving

therefor the note or notes of the town, signed by the treasurer and countersigned by a majority at least of the selectmen, bearing interest at a rate not exceeding four per cent. per annum, payable semi-annually. Such indebtedness shall be made payable in such annual proportionate payments as will extinguish the same within twenty years from the date of the delivery of said note or notes.

(More than two thirds of the voters present and voting on the motion voted in the affirmative.)

Voted that the interest of the electric light bonds be applied towards the payment of the High School note interest, and that all amounts received for maturing electric light bonds be applied to the payment of the annual instalments on the High School debt.

Voted that the committee making the report act as a committee to carry out the vote of the town in relation to the building of a High School Building, and that John W. Titus, William Carter, J. G. A. Carter, Aaron Twigg, Francis L. Fuller, Francis de M. Dunn and Adaline E. Harris constitute said committee.

Dr. Lewis E. Morgan was chosen a member of the committee in place of J. G. A. Carter who declined to serve.

Voted that Emery Grover be added to the committee.

Voted that the committee on High School Building be authorized to acquire any one of the three lots mentioned in their report, which shall to them seem best, considering location, price, etc.

Voted that the High School Building committee just appointed be authorized to acquire any suitable lot situated on Highland avenue, between the residence of Mr. Nickerson and Highlandville, on which to erect said building.

Voted that a sum not exceeding four thousand dollars (4,000) be appropriated to pay for a suitable lot of land to be selected by the building committee on which to erect the new High School Building. This appropriation shall be paid from the school fund now in the hands of the selectmen.

Article 4. Dismissed.

Article 5. Dismissed.

Article 6. Voted that the sum of three hundred and fifty dollars be appropriated to defray the expense of a police officer at Upper Falls.

Article 7. Voted that the selectmen be authorized to lease the town hall for a period not exceeding five years, and at a rental not to exceed the present one.

Article 8. Voted that the town issue bonds to the amount of $5,000, to be dated the first day of September 1896, to bear interest at the rate of four per centum per annum, payable semi-annually on the first day of March and September in each year, to be of the denomination of one thousand dollars, the principal sum to be payable in the year 1925, the said bonds to be executed and issued under and according to the provisions of Chapter 107 of the Acts of 1888, Chapter 35 of the Acts of 1891, of Chapter 258 of the Acts of of 1892 and Chapter 107 of the Acts of 1893. (Passed unamimously.)

Article 9. Voted that so much of the ancient roadways described in the town records in the year 1715 as "a road laid through the house lot of Henry Alden near the house of William Mills" and in the year 1754 as "a road from William Mills jr.'s house lot to the road leading by Jeremiah Eaton's," as lie to the north of the line dividing land of Maria Coburn and Carrie J. Bowen from land of George G. Saville be discontinued.

Article 10. Voted that the town of Needham advise the selectmen to lay out Pine Grove street as per plan drawn by Emery Grover, Esq., and now in the hands of the selectmen.

Article 11. Voted that the town will adopt by-laws relating to plumbing and the inspection of plumbing in accordance with the provisions of Section 7, Chapter 455 of the Acts of 1894.

Voted that this meeting be dissolved.

Dissolved.

NOVEMBER 3, 1896.

---

In pursuance of the foregoing warrant, the inhabitants of the town of Needham, qualified to vote in state elections, met in the Town Hall, in said town, on Tuesday, the third day of November, in the year one thousand eight hundred and ninety-six, it being the Tuesday next after the first Monday in said month, and were called to order at six o'clock in the forenoon by William G. Moseley, chairman of the board of selectmen, who read the warrant calling said meeting and the return thereon of the officer who warned and notified the inhabitants.

The selectmen having appointed Robert E. Ames and William G. Courtenay as ballot clerks, they were sworn to the faithful discharge of their duties by William G. Moseley, the presiding election officer.

The package containing the first set of ballots received from the secretary of the commonwealth was then delivered by the town clerk, sealed, to the chairman of the selectmen, who publicly opened the package and delivered the ballots to the ballot clerks.

Cards of instructions together with copies of the proposed amendments to the constitution were then posted in each of the voting compartments as required by Sec. 149, Chap. 417 of the Acts of 1893.

Cards of instruction, specimen ballots and copies of the proposed amendments to the constitution were posted in

the hall, outside of the guard rail, in accordance with the provisions of said Act.

The ballot box furnished by the commonwealth for use at elections was then publicly opened and shown to be empty. The box was then locked and the key to the lower part delivered to George Twigg, the officer in attendance at the polling place.

The polls were opened for the reception of ballots at six minutes past six o'clock in the forenoon and were kept open until thirty-three minutes past four o'clock in the afternoon, when they were closed. At the opening of the polls the ballot box register stood at 0—0—0.

The selectmen appointed Henry D. Rodgers, Joseph Foley, Armand J. Mathey, Elmer H. McIntosh, Charles H. Allen and Elwyn R. Thorpe, as tellers, and they were sworn to the faithful discharge of their duties by the presiding election officer.

Robert E. Ames and William G. Courtenay were appointed as additional tellers by the selectmen, and were duly sworn by the presiding election officer.

During the voting, at two minutes past 12 o'clock, the ballot box was opened with the unanimous consent of the selectmen and town clerk, and three hundred and fifty ballots were taken from the box. At the close of the polls the ballot box register stood at 652. As the ballots were taken from the box they were audibly counted one by one by the presiding election officer, and the whole number was six hundred and sixty.

The names on the list of voters used at the ballot box which had been checked were counted, and the number found to be six hundred and sixty (660), which agreed with the number of names checked on the list kept by the ballot clerks at the entrance to the voting place.

A canvass of all the votes given in was made by the

election officers as required by the Election Act of 1893, and amendments thereto, the blank forms furnished by the secretary of the commonwealth being used. Upon the completion of the canvass of all the votes cast and the whole number duly sorted, counted and recorded, public announcement thereof was made by the town clerk in open town meeting and was as follows:

Police Officer and Keeper of the Lockup.

# REPORT

OF THE

# Selectmen and Overseers of the Poor.

To the Tax Payers and Citizens of Needham:

To meet the general expectation of a report, in addition to the itemized financial statement, your officers present the following:

Highways.—A personal inspection was made by us of the roads in town, and repairs have been made where we deemed the most pressing demands existed. That all the roads in town have not been repaired the past season is owing to the fact that it was impossible. The board was fortunate in securing the services of Mr. Nathaniel Wales as superintendent of streets, and he has attended to the duties of that office very efficiently. Under his direction, South st., Central ave., Grant st., Webster st., Highland ave., and Chestnut st. have been greatly improved. Over three thousand loads of gravel, and eleven hundred tons of crushed stone have been spread upon the highways, besides a large amount of waste and stones moved and carted away. The work has been done at a saving of over forty per cent. in the cost of supervision. The selectmen, realizing that crushed stone is acknowledged the best road material, had the crushing plant put in working order by having a screen, elevator, and bins attached. The piece of road built on Highland ave. is considered a

first-class job, and the crushed stone used gave proof of the benefit to be derived from this improvement. Following the expressed wish of the town, the board has taken steps toward the re-location and widening of Webster st., and the laying out of Pine Grove st. The county commissioners have ordered the re-building of Great Plain ave. from the point where the improvements stopped, some years ago, to the Wellesley line; the same to be completed before October first, next. A franchise has been granted the Newton & Boston Street Railway Company for an electric railroad from Eliot st., Newton, to Great Plain ave., Needham Plain.

Sidewalks.—The appropriation for sidewalks has been expended in a judicious manner and for the benefit and improvement of the town. Hillside ave., Central ave., Great Plain ave., Maple st., and the Needham Upper Falls have had marked improvements made on their sidewalks.

Poor.—In no department connected with the public administration of town affairs, do such perplexities arise as in the care of the poor. To deal justly by the town and to act wisely for the poor has been the constant aim of the overseers. The effects of the depression everywhere prevailing are reflected in our financial report. The deficiency there shown results from bills brought over from last year, also from the heavy expense of Mary A. Gehling, whose support the town has been called upon to assume. The inmates of institutions are the same as last year, with the addition noted above. Charles A. Hines and Charles M. Leach have been admitted to the almshouse, making the number now at that place four. Personal visits have been made to the different places where the poor are supported. The number of tramps cared for is 1,049, at an expense of $57.65. We would recommend that some

method be adopted, which will make some return to the town by compelling those cared for to labor, in some way, for a stated time.

Police.—The services of night watchmen at Needham Plain and Highlandville have been continued. Numerous cases calling for police work have caused the deficiency shown by the report. No appointment of a night officer at the Falls village has been made. The board feel that additional patrol service should be given to this section, but the fire risk does not call for an all night watchman. The past season has shown that the peace has rarely been disturbed in this village.

High Rock Street Bridge.—This case, begun some years ago, has been decided against the town. The question of a bridge at this point was abandoned very early in the suit. The only question remaining was the right of a grade crossing, some distance north of High Rock st. proper. This also was lost, but not until strenuous efforts had been made to secure this right to the town.

Street Lighting.—Considerable complaint has been justly made about the poor service rendered the town in the matter of street lights. The company furnishing the current are ready to relinquish their contract, if the town sees fit to have them do so. The people of the town should have the advantage of commercial lighting at as early a day as possible.

Board of Health.—The selectmen acting as a board of health have attended to all duties under this head, brought to their notice. The care attendant upon complaints is made none the lighter by the fact that interests are involved on both sides. It is a matter of congratulation that no serious contagion has manifested itself during the year.

Sewerage.—The complaint of the Wellesley water commissioners that the drainage from the Highlandville section of the town is polluting their water supply, calls attention to the need of a sewerage system. The character of the soil in this locality does not admit of filtration, and some plan should be devised at once to care for the health of our people, as well as to remove cause for complaint from our neighbors. The importance of this question overshadows all others at the present time.

The fire department, and the care of the fire alarm and wires have remained under the efficient heads of last year.

Appropriations.—The different boards have made their recommendations for appropriations, according to their judgment of the needs of the town for the current year.

WILLIAM G. MOSELEY,
FRANCIS L. FULLER,
GEORGE K. CLARKE,
} Selectmen of Needham.

# Report of Chief of Fire Department.

FIRE DEPARTMENT HEADQUARTERS,
Dec. 31, 1896.

TO THE BOARD OF SELECTMEN.

Gentlemen:—

I herewith submit to you my third annual report, for the year ending Dec. 31, 1896:

## FIRES.

A total of 26 calls, including 3 second alarms, were answered by the department as follows: bell alarms 21, still alarms 1, verbal alarms 3. There were seven buildings damaged and four totally destroyed. For two of there buildings there were no alarms given. Total number of fires, 25. The above alarms were given as follows: police 3, citizens 15, firemen 4. Owing to the dry weather in the early part of the season, wood and grass fires were quite numerous, a great many being caused by carelessness in burning brush.

## VALUE OF BUILDINGS AND CONTENTS WHERE FIRE OCCURRED.

| | |
|---|---|
| Value of buildings, | $16,250 00 |
| Value of contents, | 11,676 00 |
| Total value of property at risk, | $27,926 00 |

LOSS ON BUILDINGS AND CONTENTS.

| | |
|---|---|
| On buildings, | $7,926 00 |
| On contents, | 4,988 50 |
| Total loss for the year, | $12,893 50 |

INSURANCE ON BUILDINGS AND CONTENTS.

| | |
|---|---|
| On buildings, | $13,200 00 |
| On contents, | 9,225 00 |
| Total insurance, | $22,425 00 |

INSURANCE PAID ON BUILDINGS AND CONTENTS, AS FAR AS CLAIMS SETTLED.

| | |

HOSE.

The department has 3,400 feet good hose, 450 feet in fair condition, 150 feet leaky hose, and 400 feet condemned hose, The condemned hose has been in service since the department was organized; the good hose is divided between the four stations. I would recommend the purchase of 500 feet new hose as I consider that additional amount necessary to enable the department to render efficient service should a large fire break out in the centre of either village.

APPARATUS.

The apparatus is in good repair, with the exception of the Hose Reel, No. 3, which formerly belonged to the old Hand Engine, No. 2. It is not sufficiently large to accommodate the hose and other equipments which should be carried on it, and it is very much out of repair. It would not be advisable to expend much on it. Some piece of apparatus should be provided to take its place in the near future. The Truck, Hose No. 1, and Hose No. 2 have been thoroughly overhauled and painted, and are in first class order. The Hand Fire Engine, No. 2, which has been for sale the past four years, has been sold to the Boston Veteran Association. I would recommend swing harnesses for the hose wagons, as the department has been delayed several times during the year in hitching up, and by harness breaking on the way to fires.

STATIONS.

Station No. 1. The town water has been put in for the use in the battery room and for washing apparatus. The battery room has been kalsomined and painted.

Station No. 2. The hall has been kalsomined and the woodwork varnished. The town water should be put in for the purpose of washing the apparatus, as it makes it very inconvenient to carry all the water.

RESIGNATIONS AND APPOINTMENTS.

Wm. Crisp, foreman Hose No. 2, was appointed on the board of engineers, to fill vacancy caused by the resignation of Alexander Lynes, jr.

John J. Carter promoted to foreman Hose No. 2, to fill vacancy.

THE FIRE ALARM TELEGRAPH.

The fire alarm telegraph consists of 33 miles of wire, 17 signal stations and one private station, 3 town strikers, 4 tappers, 7 gongs, (one was destroyed in the fire of Atkinson's stable) 1 5-circuit switch board, 1 test clock, 100 cells battery. Signal stations 47 and 68 were added to the system this year and the switch board and the battery room have been rewired. The fire alarm system has given general satisfaction throughout the year, with the exception of the Highlandville striker, which has given four incorrect alarms. The cause of this is that the bell is not large enough to use a striker which is of sufficient weight to give a steady and accurate alarm. This should be remedied as soon as possible by having a large bell or a whistle in that section of the town. There are three localities in the town where signal stations should be located, but as we have 33 miles of wire in the system, all in one circuit, I would recommend a repeater to control what we now have, and let the signal stations go another year, and divide up the system into five circuits. As it is now, if the

line should break in a very stormy night, or by a building being burned where the fire alarm is attached, the whole system would be out and could not get an alarm from any other section in the town; but by having a repeater, the circuit that the break was on would be cut out automatically by the repeater, and then the other four circuits would be left in service and the superintendent of fire alarm could locate the accident without any trouble. It is very essential to have a repeater to make a good and efficient system, and avoid accidents which are liable to happen at any time. There are some few repairs that should be attended to the coming season. The wire from the railroad crossing on Great Plain avenue to Nehoiden street needs replacing with new wire, it being badly worn by chafing of trees, and is constantly breaking out in stormy weather. There should also be porcelain tubes put in buildings for the wire to run through, where the fire alarm is attached, for, in case of electric wires getting in contact with the fire alarm wires, it is liable to set fire to the buildings.

The contract for the extension of the fire alarm was awarded to C. A. Searcy, for the amount of the appropriation, and the work was done in a satisfactory manner.

---

My personal acknowledgments are respectfully tendered to the general heads of departments for the courtesies of the year. To the assistant engineers I am especially indebted for their hearty and cheerful co-operation in all details necessary to the successful management of this department. I am pleased also to commend the officers and members of the several companies for their earnest and faithful attention to duty.

Respectfully submitted,

H. A. KINGSBURY,

Chief of Fire Department.

INFORMATION TO THE PUBLIC.

Before ringing in an alarm be sure that a fire actually exists.

Do not give an alarm for a fire seen at a distance, as all needless alarms are an expense to the town and should be avoided.

To give an alarm pull down the hook in the box once, without jerking, and let go. Wait at the box and direct the firemen to the fire.

For a brush fire strike ten blows with the key and then pull down the hook, but never pull in alarm first for a brush fire.

After unlocking the box do not attempt to take out the key, for no one but an engineer can release it, as all the boxes have trap locks.

After the first alarm has been rung in, all other alarms or signals are given only by engineers.

Never give a second alarm for the same fire without an order from the chief engineer or assistants.

Citizens are earnestly requested to keep themselves informed as to the location of keys. Signs over the boxes will give the desired information.

CAUTION TO PERSONS HOLDING SIGNAL KEYS.

Never open or touch the boxes except in case of fire. Be sure your station is locked before leaving it. Never let the key go out of your possesion, except to some responsible person, to give an alarm of fire, and be sure the key is returned.

If you remove from your house or place of business, return the key to chief of fire department.

# REPORT

OF THE

# Superintendent of the Public Schools

## OF NEEDHAM.

---

To the School Committee:

I herewith submit my fourth annual report of the public schools of Needham which also embodies the reports of the principal of the high school and of the supervisors of music and drawing.

---

Having resigned the superintendency of your schools and my successor being actively in office, it is neither proper nor necessary for me to consider the present and future needs of your schools, but to confine myself to a report upon the work attempted and accomplished during the past year.

I have no doubt of the competency of my successor to deal with the educational problems of Needham, nor of his ability to solve them satisfactorily with your aid. To him and to you, therefore, I consign them, assuring you

both of my best wishes for eminent success and for the highest good of the children under your care.

Wherein my work shall be found wise and right, I shall be glad, and even more glad, wherein it shall prove weak and unwise, to see it corrected. Time often reveals truths thought failed to foresee. Theory often fails to grasp difficulties practice finds conspicuous, working together they will discover the best way.

I should fail to do my whole duty to the schools and the community should I pass unnoticed the most discouraging and demoralizing influence with which we have had to contend during the year. I refer to the unfortunate advent of politics into the discussion of school questions. Politics are the bane of the schools throughout America. A partisan spirit is incompatible with judicious thought or rational action. When one has a personal end to reach, he is apt to sacrifice the common good. Many persons can destroy what they cannot construct. Some feel free to criticise recklessly what they are incompetent to appreciate. Such critics often attribute to others motives existing nowhere outside of their own minds.

I have no personal complaint to make of the treatment received at the hands of this community. Certainly, those who are prepared to speak have given full credit for both effort and results. It is not of myself I speak, but of those associated with me and of the way important educational questions have been treated. Such questions should be discussed and decided entirely upon their merits, and should receive the benefit of the best thought and effort of all good citizens. Only narrow and prejudiced minds assume that a proposition is necessarily bad because it did not originate with them, or necessarily good because it did so originate.

Whenever the schools are hurled into politics and become the foot-ball of factional caprice, innocent persons

are abused, the efficiency of the schools is greatly diminished and the children suffer loss in spite of every effort of faithful and self-sacrificing, not to say long-suffering teachers.

At one time the integrity of some of the schools, especially in the Kimball building, was seriously threatened by a spirit of insubordination and defiance, imbibed at home or on the streets. Much of the teachers' thought and energy was necessarily turned from the channels of instruction into those of control and correction. Whoever inspires the mind of a child with a spirit of rebellion against his teacher, greatly wrongs the teacher, greatly injures the school but most of all does he wrong and injure the child. The best of teachers is no match for the active opposition of an unwise home. Teachers are human and have their faults, but these should never become the topic of sympathetic discussion between pupils and parents. To my certain knowledge unwarranted, groundless and false charges and imputations have been circulated relative to both teachers and school officers. Even facts have been so colored and distorted as to be essentially fiction. Beware of the man who freely imputes to others base motives or seeks to augment and publish others' mistakes. And, also, beware of him who demands that you love only those whom he loves and hate those he hates.

Again, for all recommendations in my reports, I alone should be held responsible, they having originated with me and having been honestly presented after careful thought. Although still sincerely believing they suggest the best way to meet existing difficulties, I should not have made them at that time had I known to what they would lead, for the cost has been too great; not in dollars and cents, but to truth, justice, friendship and public harmony. There are some things this community needs even more than school accommodations. They are mutual respect,

confidence, good will and harmony between the people; the rational and hearty co-operation of all for the improvement and good reputation of the town. If all your good people will honestly seek the public welfare, rising entirely above personalities and partisan schemes, harmony will prevail, innocent persons will cease to suffer, the common interests will prosper and all will be much more happy.

I can wish you no better thing than that in the future, all personal and factional elements be eliminated from the consideration and discussion of the needs of the schools and the community.

### THE POLLARD SYSTEM.

One year ago the Pollard Synthetic Method of teaching reading was unanimously adopted by the school committee and at once introduced into the first two grades of the primary schools, displacing the Word and Sentence Method.

Although September would have been a more favorable time than January for introducing the new method, the results have been excellent—much better than anticipated.

The new method is so radically different from the old that the teachers have been as much learners as the pupils. All the teachers were willing to try the new method and some were anxious to do so, being thoroughly convinced of its superiority by results observed in schools where it was in use. In their reports upon the method at the close of the year, the primary teachers speak favorably of it and many of them enthusiastically. Such criticisms as were offered referred to some features of the books of the system and some of the author's devices rather than to the method. Doubtless these criticisms will soon be successfully met by the improvements which, I understand, the author is now making in her books.

The system in a most attractive way and one wonderfully well adapted to the child mind leads the little learner from the elementary sounds of the language up to a mastery of the printed word and to good reading, and by a method which sacrifices neither his interest, intelligence nor independence. He learns by means of what he HAS LEARNED and constantly has the pleasure of new and independent discovery. He is not made dull and credulous by endless telling, but alert and scientific by working systematically according to laws perfectly intelligible to him. Children enjoy most and learn best those things in which muscle supplements brain. By the Pollard method eye, ear, hand, brain and vocal organs take a part.

We are told by those who object to the method, "That the child's attention should not be called to the WORDS but to the THOUGHT lying back of the words;" that he should "look and say;" that words are only "windows" through which to see thought. All my observation of children's reading leads me to believe that the WORD is the prime obstacle to good reading. Until the child is master of the words in a sentence, the thought is locked. He may GUESS what it is but he does not KNOW. The views one gets through opaque windows are not particularly definite or inspiring. A TRANSPARENT MEDIUM must precede absorbing thought. When the child is no longer troubled by the words, his whole attention can be given to the thought and its adequate expression.

The child's first reading should be composed of words from his oral vocabulary, then, as soon as he is master of the printed words, he is master of the thought. If strange words be introduced, he must, by whatever method taught, first be taught their meaning. When the thought is in mind to secure good expression is comparatively an easy matter. The Pollard system makes the learner master first, of the sound values of the letters in combination, then

of the words and the thought. To begin at the other end —with the thought— is wrong and actually impossible of attainment. By skillful methods of indirect telling, we may develop expert GUESSERS, but never intelligent and independent readers. Just so far as the child learns to read surely and independently he does so by a synthetic process.

Some object to the Pollard Method because by it the learner is able to pronounce readily and correctly words whose meanings he does not know. Few adults can read a column in a newspaper without doing the same thing, except, perhaps, they cannot pronounce the strange words "readily and correctly." Which is better, to teach one word at a time or a law of the language by which the child can pronounce with certainty whole classes of words ? Which is easier, to teach both pronunciation and meaning or the meaning alone to one already master of the pronunciation ?

One of the strongest evidences of the superiority of the new method over the old, is the marked increase of interest on the part of the pupils. Indifference has given way to enthusiasm. After all, the child's interest is a better test of a method of teaching than the soundness of our logic.

One teacher writes,—"The children are interested in the first lesson and anxious for the next. * * There has been a marked improvement in the ability of the pupils to recognize words at sight, in distinct articulation and correct pronunciation. * * Bright children will learn to read well by any method but I consider the Pollard a boon to the average or dull child. * * I have had pupils taught by the usual method when it seemed impossible for them to remember from day to day easy words or sentences, while with the Pollard it makes no difference whether they remember words or not. They have the ability to mark and find them out for themselves. I can call to

mind three children who a year ago could scarcely read anything; they are now among the best in the class, reading with confidence and expression. There has been great improvement in their spelling also. One reason why children do not read for themselves at a much earlier age, is because it is too hard work. They meet so many new words that they are discouraged and give up. Under this system they are not dependent on others and find reading a pleasure instead of a task. * * As the pupils advance and need to use the dictionary, they have the power to read at a glance the diacritical and accent marks. They can look up a word in one-tenth the time now taken and be sure they are right without asking."

Another teacher says,—"The children thoroughly enjoy their reading. My experience teaches me that it makes no difference, in regard to holding their attention, whether we are studying sounds, marking or reading. * * It furnishes a great amount of profitable busy-work for first grade pupils. I have found the system very helpful in teaching children of foreign parentage and birth as it begins with the sounds of the letters."

It will require, at least, three years to fully prove the merits of the new system.

### UNGRADED SCHOOLS.

Two years ago the school committee voted to abolish the ninth grade in all the outlying and ungraded schools, and to allow the pupils of this grade to attend one of the village grammar schools during the last year before entering the high school.

The wisdom of this plan will appear when the unfavorable conditions of the work in these ungraded schools are known.

Formerly the teacher of an ungraded school had nine grades to instruct, while no teacher in the Kimball or

Avery schools had more than two. This allowed the teacher of an ungraded school, on the average, less than 32 minutes a day to devote to each grade, while the teachers in the graded schools had at least 145 minutes a day for each grade; the pupils thus in one case receiving the benefit of about four and a-half times as much of the teacher's attention as in the other. Sometimes, however, the classes in the ungraded schools could be so united as to reduce the number of grades to eight, or, perhaps, seven, in which case the average time for each grade was increased to 35 or 40 minutes a day, making no allowance for time lost between the numerous recitations.

The number of daily recitations, or exercises, in the graded schools is not less than five for each grade, having an average length of 29 minutes each. If each grade in the ungraded schools had the same number of recitations, the average length would be 7 or 8 minutes. That is, the pupils in the ungraded schools received less than 25 per cent the instruction received by those in the graded schools, and this not for one year alone but for nine. To expect pupils receiving less than one-fourth as much instruction to advance as rapidly as those receiving the full amount, is equivalent to saying the former pupils are four times as bright as the latter, or that the teaching is four times as efficient, or that there is a combined superiority of pupils and teacher which yields the same results. Without questioning the ability of either the pupils or the teacher, all know the hypotheses untrue. In fact, other things being equal, the teaching is necessarily inferior to that in the graded schools, because the teacher has so many grades and classes. She must teach all grades—primary, intermediate and grammar, and must prepare herself to teach all subjects in a nine years' course to pupils of all ages from five to fifteen. No teacher can do her best work under such conditions.

Again, the average class in the ungraded school is very small—not more than three or four. It requires unusual ability on the part of the teacher to arouse and maintain the interest of so small a class, especially when composed of children intimately acquainted or from the same family, and the difficulty is largely increased when the average length of the recitation is reduced to 7 or 10 minutes.

There is another side of the question which is quite as important as any already named—the social and moral side. There is a development and refinement which come to a child from studying, playing and associating with a larger number of children of about his own age, which can come no other way nor at any other time, and which will prove a most important factor in his life. Such associations tend to stimulate ambition and effort, to develop self-control and self-respect, to give a better knowledge of one's fellow-men and a greater estimate of one's self.

Bringing the pupils of the upper grades together at the central schools gives them a more nearly uniform preparation for the high school.

Since September the ninth grade pupils of the Eliot school have continued to attend there, because there was no eighth grade in the school.

On account of the unusually large class in the Kimball grammar school the ninth grade from the Parker has attended the Avery grammar.

### TEACHERS' MEETINGS.

With few exceptions, a general teachers' meeting has been held every two weeks during the year. The topics discussed have been geography and school management, or the relation of teacher and pupils. As an outgrowth of these discussions an elementary course in geography has been prepared by the superintendent and is now in the hands of the teachers.

The teachers have been very regular in their attendance at these meetings and have manifested a commendable professional spirit. They have been appreciative and shown a marked desire to improve themselves so as to render the best possible service to their pupils. Never have these meetings been more profitable than during the last year. The frequent presence of members of your committee has been a very helpful influence, withal.

HIGH SCHOOL.

Last June after four years of faithful service Mr. Clarence L. Judkins resigned the principalship of this school. Mr. W. Hollis Godfrey was elected to fill the vacancy. Mr. Godfrey came highly recommended, and, although working under unfavorable conditions, seems to have won the respect of the pupils and to be doing good work. Satisfactory work, however, cannot be done by either teachers or pupils until adequate room and suitable equipments are provided. I herewith submit the principal's report.

NEEDHAM, January 1, 1897.

MR. F. E. PARLIN,

Dear Sir: I herewith submit to you my first annual report.

During the four months I have been connected with the school no marked changes have taken place. The need for more room is more evident this year than ever, as we have more scholars than at the corresponding time last year. We have, however, done what we could, by placing new desks in the recitation room for the entering class, which this year numbers twenty-seven.

The need for another assistant mentioned in the last report, has been satisfied as a new assistant comes in with

the new year, who will divide her time between the high and grammar schools. With this aid we shall be able to lengthen the recitation periods and add some hours to various subjects, giving a better opportunity for work of a most thorough kind.

A pleasing fact this year has been the number of pupils who have expressed the intention of taking examinations at some college or technical school, this number being about one-fourth of the whole school. The desire for a higher education on the part of any student directly raises the standard of his own work, and indirectly the standard of work of the whole school.

The attendance during the fall has been good. We have lost some scholars, but have received others during the term, two of our scholars coming from out of town.

The general tone of the school during the fall has been excellent. The work has been done cheerfully and willingly, and a general feeling of honor, in work and conduct, prevails throughout the school.

The work in the Harvard course of experimental physics has been continued this year. Some new apparatus has been bought, and we are gradually getting the equipment of the laboratory on a firm basis.

The work in chemistry is intended to be a good laboratory course in elementary qualitative analysis, and is well adapted to a laboratory without proper appliances.

The work in German is of especially high quality, and in each department every effort is made to reach the highest possible standard.

Respectfully yours,

William Hollis Godfrey.

MUSIC.

The musical instruction in the schools has continued in the same efficient hands as last year, and excellent work has been done. There certainly has been a marked improvement in this department. You should consider yourselves fortunate in being able to retain such an instructor.

I herewith submit the supervisor's report.

---

Mr. Frank E. Parlin, Superintendent.

Dear Sir: I am glad to report progress in the music department of the Needham schools during the year past. I have endeavored to improve the quality of the children's voices by the use of certain drill work and believe a foundation is being laid for a great work along this line. The teaching of the proper use of the voice is an important part of the music work in the schools, and should begin in the primary grades.

I can see an improvement in the ability to read music at sight in all of the grades, especially in the primaries and lower grammar.

The use of Mr. H. E. Holt's vocal harmony exercises has helped the scholars along this line, and it is my intention to develop this work still further this year.

The general spirit of the scholars toward music is good, and I think has improved very much.

The high school has done excellent work in music. A very creditable concert was given by the school in the town hall, on the evening of March 24, 1896. The school was assisted by Mrs. C. A. Marsh, soprano; Miss Clara M. Sutton and Miss Mary A. Tisdale, sopranoes; Mr. Peter Willgoose, tenor; Mr. Harry Young, bass; Mr. Frank Willgoose, violinist; Mrs. Edith Lyman, pianist, and an augmented chorus of ladies and gentlemen. The

first part of the concert consisted of solos and part songs by the school and glee club, the second part, a cantata, "The Wreck of the Hesperus," by Anderton. The work of the school in the cantata was especially good.

The concert was a success both musically and financially. The music of the school at the graduation was creditable, especially those numbers rendered by the glee club. I would suggest to your committee that they look into the question of whether it would not be better to have the music teacher visit the schools more often than he can under the present plan. I find that where schools are visited every week by the special teacher the scholars are more enthusiastic and better results can be obtained. I believe money expended in this way would pay.

In closing this report, I wish to thank you and the committee for your hearty support, also the regular teachers for the way they have carried out and developed the work.

F. W. Archibald,
Supervisor of Music.

DRAWING.

Although the instruction in drawing has been according to a course in general use throughout the state, it has not been entirely satisfactory. It may be seriously questioned whether so much abstract and technical work is best adapted to the pupils in the primary grades. The time will soon come when sphere, cylinder and cube will not be the trinity of primary drawing lessons. This is not intended as a criticism of the supervisor but of the usual course in primary schools. No one can question the effort and faithfulness of the supervisor. She has under consideration changes in the course which when completed will materially improve it. If she has done too

much of the work herself, it has doubtless been for two reasons—because the pupils lacked preparatory training and because of her anxiety for their advancement.

I herewith submit the supervisor's report.

---

Mr. F. E. Parlin, Superintendent of Schools.

Dear Sir: I am encouraged with the work in drawing, especially that which has been done since September of this year.

The work, with the exception of the three lower grades, has consisted chiefly of drawing from the models, objects found in the vegetable kingdom and simple objects about the school room. The pupils have improved over last year's work greatly, in their power to see things and also in their ability to express, more readily, what they see. This improvement is especially noticeable in the schools where three and four grades are taught together the same lessons.

In the mechanical work of the next few months, in both the upper and lower grades objects will be drawn which can be constructed, as the manual training derived from this work is needed greatly, as I found in last year's work, a very small proportion of the pupils being able to work with the necessary accuracy and neatness this work requires.

In order to do the work properly the pupils should be furnished with small drawing boards, triangles, etc., which I think can be obtained at a reasonable price.

As soon as the season permits so that the pupils may work from life, I hope to introduce the use of water color in some of the grades at least.

I have been unable, on account of the over-crowded condition of the high school to continue the work in

drawing there, and have spent the extra time in the lower grades, teaching in one extra grade in the Kimball school and visiting the Parker and Harris schools once in thrree weeks instead of as formerly once in four.

If the work in the high school is to be continued, I trust it will be in classes, as I feel that much better results will be obtained in that way, separating the school in at least two divisions and more if possible.

Respectfully submitted.

Alice M. Prince.

STATISTICS.

The school census of 1896 gives 255 as the number of children in Needham between five and eight years of age, and 362 as the number between eight and fifteen—or 617 between five and fifteen years of age. Of this number 302 were boys and 315 were girls.

Comparison with the report of last year shows an increase of 20 in the number of children between five and fifteen years of age, a decrease of 6 in the number of pupils enrolled, an increase of 51.74 in the average membership, a very small decrease in the percent of attendance and an increase of 47 in the membership at the close of the year.

This indicates that there have been about 50 more children in the schools this year than there were last.

The average membership of the high school has been 15.87 larger than last year. The average membership of the rest of the schools in the Kimball building has been 29.15 larger, making the increase for the building 45.02. The average memberships for the other buildings as compared with that of last year are as follows:

Avery, an increase of 2.23; Dwight, a decrease of 3.85;

Eliot, an increase of 12.71; Parker, almost exactly the same as last year and the Harris a decrease of 2.

The ninth grade is unusually large, numbering 60 pupils which promises a very large entering class for the high school next September.

---

Sincerely thanking you and the teachers and the community for every word and act of helpful cooperation, wishing the schools and the town abundant peace and prosperity and bespeaking for my successor as kindly feeling, as generous treatment and as adequate appreciation as has been accorded me, I respectfully submit this my final report.

FRANK E. PARLIN.

Needham, Jan. 20, 1897.

# REPORT

OF THE

# SCHOOL COMMITTEE.

To the Town of Needham.

The school committee respectfully submit their annual report together with that of the superintendent for the financial year ending Dec. 31, 1896.

The schools of Needham have now been under professional supervision for over three years, and the committee feel that there can be no question of its great advantage to them. The same verdict comes from nearly all places where it has been adopted.

Nearly ninety-five per cent. of the school population in Massachusetts is under supervision, and without doubt in a very few years it will be universal throughout the state. "The employment of an experienced and intelligent leader, responsible for results, is as necessary in school affairs as it is, and is acknowledged to be, in all other organizations and occupations; a leader who shall spend all his time and strength in looking after the interests of the scholars, and who shall be constantly devising new means for their improvement, so that there may be an adequate return for what is expended."

Radical changes and experiments have not been made for the sake simply of having something new, but only

such changes have been adopted as seemed to be in harmony with the broader educational methods of the day.

In this connection the atttention of the citizens is particularly called to that portion of the superintendent's report relating to the "Pollard System," a new system of reading and spelling introduced into our schools a little more than a year ago.

Soon after the resignation of Mr. Parlin in November, the committee were fortunate in securing the services of Mr. Henry M. Walradt, a graduate of Yale college, a man of high scholarship, and of successful experience as a teacher and superintendent. The town may feel sure that what has already been gained by supervision will not be lost under new guidance.

Recognizing that primarily the teacher makes the school, great care has been taken in the selection of teachers, and it may be laid down as the settled policy of the committee to require all applicants for positions in our schools, to have a high school education—or its equivalent—and some training in a normal or training school.

The best educational results have not been possible in the schools of the Kimball building, because of the lack of room for the proper sub-division of the grades. In some rooms the number of pupils is so large that an assistant teacher has been found necessary, who is either obliged to carry on her recitations at the same time in the same room as the regular teacher, or else take her pupils into one of the dressing-rooms. The lowest primary grades suffer the most from such unfavorable conditions of teaching, because if the children make a poor beginning, they will hardly recover the lost ground during their entire course. Three dressing-rooms are now being used for recitation purposes.

Moreover to compel children to recite in these small, ill-lighted, poorly ventilated rooms is a menace to their health.

The committee, therefore, urge upon the town the imperative need of taking immediate action to provide suitable accommodations for the schools in this building, so that there be no further detriment to the proper care and instruction of a large number of our children.

Unexpected demands for new sets of books, caused by the introduction of the "Pollard System of Reading and Spelling," the replacing a series of geographies, the payment of tuition to the town of Wellesley, the purchase of twenty-eight new desks for the use of the high school, have increased the expenses of the books and supplies, and incidentals so that they are in excess of the appropriations.

The committee recommend that all money paid the treasurer on account of tuition for pupils from other towns, be credited to the appropriation for school incidentals, to make good any amounts paid for tuition or otherwise from said appropriation.

The committee ask for an increase in the appropriations for 1897. This is necessary for the salary of a teacher engaged at the beginning of the present school-term to assist in both the high and grammar schools, and also for the additional expenses in books and supplies caused by a constantly growing school population.

We recommend $12,300 for schools, including the salary of the superintendent, $900 for incidentals, and $900 for books and supplies.

An additional appropriation will be necessary, if any of the school buildings are painted during the year.

For further information in regard to the schools, we refer the citizens to the report of the superintendent.

Respectfully submitted,

FRANCIS DEM. DUNN,
ADELINE E. HARRIS,
JOHN W. TITUS,
} School Committee.

# REPORT

OF THE

# Trustees of the Free Public Library.

The trustees desire to express their thanks to all those who have donated books and periodicals to the library, and also to the committee on the 4th of July celebration for a gift of $29.72.

A public library is a public benefit. The condition of the public library and the quality of the books called for is a pretty good criterion by which to judge of a town. Next to the public schools the public library is the great educator of the people. In the public library, as in the public schools, the children of the poor man have equal advantages with those of the rich. We are pleased to note the large number of the citizens of the town who avail themselves of the privileges of the library. It is especially gratifying to see the interest taken in the library by the teachers and pupils of the public schools. The number of volumes issued the past year is greater than ever before. As has been stated in previous reports, the library needs more room. The reading-room is small and poorly adapted to the needs of a growing town like Needham. The reading-room at Highlandville is larger and more pleasant. It is under the immediate supervision of two of the trustees, Mrs. Carter and Mr. Hudson, who have been

connected with the library since its formation, and who, from their experience and great interest in the cause of education, are well fitted for the position. Aside from the location and lack of room the library is in an excellent condition. The books have been selected with care and are well adapted to the wants of its patrons.

Chairman.

# SEVENTH

# ANNUAL REPORT

OF THE

# WATER COMMISSIONERS.

---

To the Inhabitants of the Town of Needham, Massachusetts.

The board of water commissioners herewith submit their seventh annual report for the year ending Dec. 31, 1896.

At the annual town meeting in March, Mr. Edmund G. Pond was elected water commissioner for a term of three years. The board organized by choosing Edmund G. Pond, chairman, and George A. Adams, secretary.

At a special town meeting held June 1st., Mr. Frederic G. Tuttle was elected water commissioner to fill the vacancy caused by the resignation of George A. Adams. The board re-organized by re-electing Edmund G. Pond chairman, and appointing George A. Adams, clerk.

Mr. Charles H. Mitchell was retained as engineer at the pumping station, and George A. Adams was appointed superintendent and water registrar.

## Extensions.

The following extensions have been made during the

year in Highland terrace (off Highland avenue near Charles river), Davenport, Hunting, Mills, Upham and Sachem roads (in Hahaton field), Greenough, Avery and Pine Grove streets (off Hillside avenue), Gordon terrace off Webster street. All of the above named are private ways, and the extensions were made under a guarantee of six per cent. interest on cost of construction until such time as the water rates on each extension will be sufficient to pay said interest.

The extension in Dedham avenue and South street was made under a six per cent. guarantee for ten years. For length of extensions see superintendent's report.

## Pipe.

The contract for furnishing pipe was awarded to R. D. Wood & Co., of Philadelphia, Pa., at the following price, viz: $21.70 per long ton for pipe, and $2.125 per cwt. for specials, F. O. B. cars at Needham.

## Pipe Laying.

The contract for laying pipe was awarded to Joseph Bruno, of Boston, at the following prices: 19 cents per running foot for 4-in. pipe, 21 cents for 6-in., and 23 cents for 8-in.

## Meters.

At the annual town meeting a vote was passed instructing the water commissioners to "place a meter on every service" as recommended in our last report. Pursuant to the vote the required number of meters were bought and set in the month of May. The change to the meter system made it necessary to revise the rules, regulations and water rates. The change made in the date of collecting the water-tax from June 15th and December 15th, to April 15th and October 15th, proves to be a great benefit, as it gives sufficient time to collect the tax before the close of

the financial year, December 31st. With the change the department received only ten months' income in the year 1896, although the total was equal to the estimates made for the twelve months before the meters were adopted. The whole change was made with as little friction as possible, and in most cases was entirely satisfactory to the consumer.

### Setting Meters.

The contract for setting meters and furnishing the necessary fittings was awarded to Buckley Bros., they being the lowest bidders at 38 cents per meter.

### Service Pipes.

The contract for putting in service pipes was continued another year with Buckley Bros. at the same prices as heretofore.

### Bonds.

Bonds were sold in June, 1896, to Brewster, Cobb & Esterbrook, of Boston, Mass., to the amount of five thousand dollars, in denominations of five hundred and one thousand dollars, as per vote of the town. The premium received was $275.00.

Two thousand dollars of the matured bonds have been paid during the year.

### Bonded Debt.

The outstanding water bonds mature as follows:

## Horse Troughs.

Three horse troughs have been set this year as follows: One at junction of South and Chestnut streets, one at lower end of Highland avenue and one at junction of Reservoir street and Central avenue. There is now a total of six horse troughs in use.

## Fountains.

A new drinking fountain has been set on Great Plain avenue, near Depot square. Three drinking fountains and three fountains in the "public parks" are now supplied with water.

## Meters.

Three hundred thirty-one meters have been added to the service, making a total of five hundred eighty-four now in use. All but twelve services have meters on them; these are fountains and services where the water has been shut off temporarily. The latter will be metered as soon as water is required.

Consumers have purchased thirty-three meters during the year, which added to number reported Dec. 31, 1895, makes a total of two hundred eighty-six owned by consumers. The remaining two hundred ninety-eight are owned by the department. For sizes and kinds see following table:

The increase in consumption over last year is less than three million gallons, or 6 per cent., while the increase in 1895 over 1894 was ten million gallons or 25 per cent. This is due to the application of meters on every service during the month of May, as the increase up to that time was nearly two and one-half million gallons over the same months in 1895; while in October, November and December there were nearly one million gallons less consumed than in the corresponding months in 1895, thus showing that the meters are doing just what was claimed when their recommended in the last report, viz: stop the waste caused by faulty fixtures and letting a small stream run to prevent freezing.

The increase in the number of consumers and the revenue is practically the same as last year.

Respectfully submitted,

GEORGE A. ADAMS,

Superintendent and Registrar.
